States represented—

Pennsylvania, Maryland, and West Virginia 3

The Fairmont Normal.

When the free school system of the State was established with the adoption of its first constitution, the standard of education was low. The people had not fully emerged from the pioneer stage, and but a small part of the State's territory was then developed. It was necessary to secure her teachers from the adjoining States, Ohio and Pennsylvania. The need of teachers was so urgent that the educational leaders, foremost among whom was Prof. Wm. R. White, the first State Superintendent, and the first principal of this school, made early, strong and repeated effort to secure the establishment of training schools to supply this demand. They finally succeeded and the present system of Normal Schools was established, "For the instruction and practice of teachers of common schools in the science and art of teaching."

The anticipations of the founders have been fully realized, the influence of the Normal Schools has been greater than any other in bringing about the great educational uplift of the State. And the influence of this chool has been marked in this worthy cause.

Since the establishment of these schools there has been, and is still, a lack of high schools, and it has been necessary for them to do high school and academic work, as well as professional. This condition still exists. This work must still be done. But it is a condition common to all Normal Schools; and a comparison of our Course of Study with those of the best Normal Schools in the United States, will convince the most skeptical of our friends that our Normal Schools are worthy of the name.

It is true that much of the modern technique of training work was not demanded in the earlier years of their existence, and they are still somewhat deficient in this respect, but there was that in our Normal especially, which was far better, the soul to soul contact with great leaders, and the inspiration and longing for higher ideals born in the rugged mountain farm boy, because of this contact with those whose sympathies were broad, whose lives were noble and whose methods were worthy of imitation. A modicum

A Group of Juniors

of this still lingers in the "Old Normal Halls," we trust, an inspiration and incentive to the present generation and to generations yet to come.

But after all a tree must be judged by its fruits, and not by the environments for which it is not responsible. We challenge this judgment, and with the worthy matron of old point not boastfully but proudly to her many jewels, the hundreds of her graduates and the thousands of her old students, whose influence is felt throughout our State in every phase of its material and intellectual development, and to those whose lot being cast beyond her borders, have not feared to measure arms, and that successfully, with competitors from more pretentious institutions.

THE ACADEMIC DEPARTMENT.

In the Academic Department are taught all the branches required for admission to the State University, and pupils in this department are admitted upon the same terms and conditions and are entitled to all the privileges of the Normal pupils.

This department is equal in popularity to the Normal, and its graduates are admitted to the freshmen class of our State University and other institutions of like character.

NORMAL COURSE OF STUDY.

SUBJECTS ARRANGED BY TERMS.

Preparatory Studies.

FALL TERM.	WINTER TERM.	SPRING TERM.
1. Arithmetic	1. Arithmetic	1. Arithmetic
2. Geography	2. Geography	2. Bookkeeping

Orthography and Composition throughout the Course.

Upon those who have completed the full Normal course with an average standing of 80 per cent. and not below 75 per cent .on any one branch, and have been in actual attendance during the entire Third or Fourth Year, the Board of Regents will confer a diploma of graduation in the Normal department. But before any certificate or diploma is granted the principal of the school will be required to certify that those whom he recommends for graduation have fulfilled all the conditions and done all the work required for graduation.

"The entire Third or Fourth Year" shall main in this connection one full year of three terms.

ACADEMIC COURSE OF STUDY.

First Year.

Department.	Subject.	Time.	Text-Books.
English	Higher Lessons	2 Terms	Reed & Kellogg
English	Grammar	1 Term	Reed & Kellogg

Upon those who have completed the full Academic course with

an average standing of 80 per cent. and not below 75 per cent. on any one branch, and have been in actual attendance at the school from which he expects to graduate one full year, which shall be the last or next to the last year of the course, the Board of Regents will confer a diploma of graduation which will admit the holder to the freshman class of the State University. One full year in this connection shall mean one full year of three terms.

Explanation of Courses of Study.

The following is a classification of the branches of study pursued in this school:

Professional.—Psychology, pedagogy, History of Education, Elementary Logic, Ethics, School Management, Lectures on Methods of Instruction, and practice work in teaching during the Senior year. Such review of the common school branches as may be necessary will also be required.

English.—Orthography, Composition, Grammar, Higher Lessons in English, Rhetoric, and English and American Literature.

Ancient and Modern Languages.—Latin, Greek, German, and French.

Science.—Physical Geography, Physiology, Zöology, Botany, Astronomy, Geology Physics and Chemistry.

Mathematics.—Arithmetic, Book-keeping, Algebra, Geometry, and Trigonometry.

History.—American, English, General, Grecian, Roman, Mediæval, and Modern History. Civics, Constitution, and Economics.

Art.—Penmanship, Drawing, Music, and Oratory.

Professional Department.

Special preparation is necessary for success in every profession, and especially in one so far-reaching as the teacher's. He must know something of the material with which he works, its possibilities, its limitations, and its methods of growth; something of the science of education and the practical application of its principles, as well as the history of its development.

The professional studies are given below:

Psychology.

Phychology is the most important of the professional studies, and as such receives careful attention during the entire senior year. All true teaching must accord with the laws of mental development because the supreme end of education is mental and moral

development. It is the special province of Psychology to deal with these laws and the periods and phases of mental growth.

The text used is that by Halleck, with constant reference to James, Sully, Dewey, Baldwin, etc. The library is well supplied with many of the latest and best books on the subject, and the laboratory method of study is employed as far as possible.

Pedagogy.

This study aims to give a thorough idea of the meaning of education, and a practical application of the knowledge gained in the study of psychology. It seeks to develop a mastery of the principles underlying good teaching, methods of conducting the recitation, preparing courses of study, etc. Boyer's "Principles and Methods of Teaching" is used as a text with references to White, Putnam, Morgan and others. In connection with this study one term in

Theory and Practice

is required in the text by David Page, supplemented by readings in the later excellent works of Seely, Schaffer, Hanus, Butler, etc., and constant reference to the current educational articles in the standard magazines and professional journals.

Each applicant for graduation is required to teach a class during the senior year, under the direction of the principal or an experienced teacher. Frequent lectures are given on practical school room subjects by teachers whose experience has covered every phase of public school work.

History of Education.

The importance of a knowledge of the history of education was never so fully recognized as at the present time, and familiarity with it is an essential part of the equipment of every well informed teacher. The history of education portrays the theories and methods of the past, warns of error and indicates established truth, shows difficulties surmounted, and encourages the teacher by examples of heroism and consecration on the part of educators whose labors for their fellow men we discuss. To the teacher this study is a constant help in the school room, the trials of which are met with the added strength and inspiration gained from contact with great teachers of the past."

The text used is Compayre's History of Education, with reference to Painter, Seeley and Kemp, and constant reference to the library.

The "History of Education in West Virginia," issued by the

National Bureau of Education, is used in considering the local development of education.

Logic.

Logic was added to the Normal Course in order that the student might acquire a knowledge of the fundamental laws of thought, be profited by the excellent discipline of the study, and get some preparation for the pursuit of the philosophical sciences.

Dr. Noah K. Davis's Elements of Logic is prescribed.

Ethics.

No subject is of more real importance in a course of study than is Ethics. It deals with the product arising from all other research and investigation—namely, action. What we do determines what we are. We would often do better and act more commendably if we realized the influence of our actions, both on our own character and the character of those around us. The truly good man is the one in whom the universe of duty habitually predominates. William DeWitt Hyde says: "If we do our duty repeatedly and perseveringly in any direction, we form the habit of doing it, learn to enjoy it, and acquire a preference for it." Another has said: "I thank God that it is as easy to form a good habit as a bad one and just as hard to break it."

Some investigation and written work from each pupil is required in this course. The text is McKenzie's Manual of Ethics.

Department of English.

The work as planned in this department provides instruction in the following subjects: Orthography and Composition, four years; Higher Lessons in English, two terms; Grammar, one term; Rhetoric, one year; Literature, one year. We believe that the objects of teaching English are:

1. To enable the student to understand the thoughts of others, and give expression to his own.

2. To cultivate a taste for reading by giving the pupil an acquaintance with good literature, and furnishing him with the means of extending this acquaintance.

With these objects in view, the study of literature and the training of the expression of thought necessarily demand a large share of the time and attention of this department.

Orthography.

The subject of Orthography begins with the study and use of words, a careful training in the use of diacritical marks, a study of

homonyms, rules for capitalization and spelling, synonyms discriminated, and a careful study of word analysis and word building.

Constant use is made of the dictionary in order to obtain the correct pronunciation and meaning of words, and the student is required to make use of the words in sentences.

The text used in the early part of the course is Reed's Word Lessons.

English Composition.

Composition work is continued throughout the Normal Course, the student being required to write at least one original composition every month.

In the first year, especial attention is paid to punctuation, capitalization, letter writing, paraphrasing and reproduction.

In the second year, to description of known objects, journeys, real and imaginary, narratives of personal experience, biography and history.

In the third year, to exposition by means of formal and informal essays, criticisms of works read, comparison of style of different authors and development of themes suggested by literary study.

In the fourth year, argumentation showing deductive and inductive reasoning, debates on questions of public interest, characterization of noted characters in history and fiction, and original orations upon selected subjects.

Required Readings.

It has been our experience that students presenting themselves for training in the Normal Schools lack the use of books and readiness in grasping the thought of the author. To remedy these defects the entire school has been organized into sections for reading, the work being graded from the more elementary reading in the first year to the highest literature in the fourth year.

Realizing that, in this work, the student needs the guidance, assistance, and encouragement of the teacher, three periods per week are devoted to the study of the masterpieces in English literature.

This study of the meaning, method, and style of the author gives the greatest possible assistance to the composition work.

Rhetoric.

This branch continues the work in composition, but takes a more extended view of the subject.

The student is now to study the logical relations of the constituent elements of the sentence, and examine selections from the

standard authors and apply the laws to see if they possess the required principles underlying the philosophy of the subject.

The object of the work is to broaden and deepen the student's ideas so that he may become an intelligent critic.

Attention is given to the reproduction of articles, and to the study of the æsthetic side of Rhetoric.

Careful study is made of the figures of speech until the student can readily distinguish them.

Throughout the year the student is given instruction in the variation of diction and sentence structure, in paragraph making, and in the production of themes and outlines.

Text—J. D. Quackenbos's Rhetoric.

Literature.

The great aims to be attained are the appreciation of good literature and the formation of good taste. Selections in prose and poetry, representative of the great English and American writers, are read with a view of getting the thought and gaining a conception of effective discourse and literary art. This gives an opportunity to cultivate the perception of the good, the true, and the beautiful in sentiment and expression. At the same time aspirations for better living and higher thinking are quickened by acquainting the student with the life history of the large-minded, pure-souled writers of the English language. As time passes in the reading of the classics of our language, the student begins to understand the richness of our literary inheritance and to know something of the value of books and libraries.

In the reading course not only the literature of power but also the literature of knowledge is included. Biography, History, Science, and Fiction are given a place. The love of reading, inviting the student to drink from perennial springs of inspiration after school days, is developed.

Good manuals of English and American literature are read to afford the students a general survey of the whole field and to guide them in their subsequent reading. Some of the short selections are treated analytically and critically for the purpose of learning something of the technique of the literary art. Questions as to the elements and properties of style are asked. Outlines of the author's plan of the development of the subject are prepared. Inquiries into the reasons for the effectiveness of the writing are made. The description of scenes, the portraiture of characters, the structure of sentences, the allusion to different subjects, call for consideration. Definition and diction, illustration and imagery, are studied. Choice quotations embodying the wit and wisdom of transcendent

thinkers, and teaching a true philosophy of life, are stored in the memory.

Texts—Hawthorne and Lemon's American Literature. Halleck's History of English Literature.

Required Readings.

Required reading upon which the students report in class embraces those classics which are specified in

"College Entrance Requirements in English."

These have been arranged to and including 1905, as follows:

For 1902.

For General Reading and Composition Work.

George Eliot's Silas Marner.
Pope's Translation of the Iliad (Books I., VI., XXII., and XXIV.).
The Sir Roger de Coverley Papers in the Spectator.
Goldsmith's Vicar of Wakefield.
Scott's Ivanhoe.
Shakespeare's Merchant of Venice.
Cooper's Last of the Mohicans.
Tennyson's Princess.
Coleridge's Rime of the Ancient Mariner.

For Careful Study.

Shakespear's Macbeth.
Milton's L'Allegro, Il Penseroso, Comus, Lycidas.
Burke's Speech on Conciliation with America.
Macaulay's Essays on Milton and Addison.

For 1903-4-5.

For General Reading and Composition Work.

Carlyle's Essay on Burns.
Coleridge's Rime of the Ancient Mariner.
George Eliot's Silas Marner.
Goldsmith's Vicar of Wakefield.
Shakespeare's Julius Cæsar.
Shakespeare's Merchant of Venice.
Sir Roger de Coverley Papers in the Spectator.
Tennyson's Princess.
Lowell's Vision of Sir Launfal.

For Careful Study.

Shakespeare's Macbeth.
Milton's L'Allegro, Il Penseroso, Comus, Lycidas.
Burke's Speech on Conciliation with America.
Macaulay's Essays on Milton and Addison.

Department of Science.

The work pursued in this department embraces the following subjects: Physiology, one term; Zöology, one term; Botany, one term; Geology, one term; Physical Geography, one term; Physics, two terms; Chemistry, one term, and Astronomy, one term.

Physiology.

Physiology is now the one science that is taught in all grades of schools. Normal students are instructed in the various methods by which it may be made interesting and personally helpful to the pupil of the public schools. It is taught as an informational rather than a disciplinary subject, with special reference to personal and public hygiene, so that the teacher may be trained to know that he can do much for the happiness and welfare of humanity by skillful presentation of the laws of health.

To this end, instruction in hygiene is given with special reference to pure air, respiration, wholesome food, regular and sufficient sleep, regularity in bodily habits, care as to temperature, prudence concerning exposure, and total abstinence in narcotics.

Anatomical demonstrations are made from the bodies of domestic animals and from the Manikin Charts, and a set of Bock Steger Anatomical Models.

Text—Overton's Physiology.

Physical Geography.

The object of Physical Geography is to lead the student to understand the causes and activities of phenomena observed upon the earth's surface, and to awaken a special interest in nature and cultivate the habit of observation and thought concerning it.

In addition to this, the presentation of the subject is designed to awaken and develop a taste for the more abstract sciences of Physics, Geology, Zöology, Botany, and Astronomy.

It relates, first, to the study of the earth in relation to the solar system and movements of the earth.

Second. To the study of the atmosphere, its position, weight, heat, moisture and the constant and variable winds and luminous phenomena.

Third. To the water, its depth, position, temperature, waves,

tides, and currents and their influence upon commerce, civilization and boundaries.

Fourth. To the land, its general division, surface structure, its springs, brooks, rives, lakes, etc.; mountain structure and land sculpture, earthquakes and volcanoes.

Also a study of the earth with reference to contour and relief forms in relation to the inhabitants.

Fifth. To the climate in relation to the inhabitants and the influence which it exerts over the physical condition, civilization, occupation and religious institutions of people.

Sixth. To the various forms of life and their distribution, ending with a discussion of the highest of all forms of animal life, man.

Davis' Physical Geography is used as a text, but reference is had to the following standard works: Houston, Maury, The Earth in Space, Appleton, Cornell, Guyot.

Zöology.

In Zöology the aim is not to make Zöologists, but to encourage observation and to cultivate an appreciation of nature. It is intended to show the adaptation of scientific methods to public school work.

The work in Zöology is devoted to a study of the nine branches of Animals. As far as possible it is made practical by the study of local fauna. Holder's Elements of Zöology is used as a text. The Library supplies all necessary reference books.

Geology.

The course in Geology is designed to give a clear idea of the forces and agencies which have determined the shape and character of the earth's surface and those which are still modifying it. A Compend of Geology by Le Conte is used as a text and frequent reference is made to the same author's Elements of Geology. The subject is treated under the following heads:

First. Dynamical Geology, treating of the cause of the earth's changes and climatic variations, including the forces at work in making rocks, soils, mountains, continents, etc.

Second. Structural Geology, treating of the kinds, structure, arrangement and composition of rocks.

Third. Historical Geology, treating of the changes through which the earth has passed in the process of formation.

The object is to lead to reasoning by means of observation, to the deduction of truth and to generalization.

Interesting books on geological and related scientific subjects have been added to the Library this year.

Physics.

The work in Physics covers the ground in general physics.

The following subjects are discussed: Matter, its properties, conditions and states, dynamics, simple machines, liquids, pneumatics, electricity and magnetism, sound, heat and light.

The phenomena of electricity and magnetism are fully illustrated by experiments and visits to the electric power plant.

The school is provided with physical apparatus for illustrating the principles and performing the experiments, including the air pump, Tœpler-Holtz Electrical Machine, dynamo, induction coils, Geisslers Tubes, batteries, Leyden Jars, Wheatstone Bridge, Radiometer, electrophorus, electroscope, spectroscope, galvanometer, etc.

Crowell's Apparatus Cabinet has been added and nearly six hundred experiments can be performed as the subject is taught.

The student is required to spend one hour per week in the Laboratory performing experiments. After each experiment he is required to make a careful report in writing upon observation blanks specially prepared for the purpose. These reports, after review and criticism by the teacher, are returned to the student, who is given full credit for the work thus done.

The text used is Avery's School Physics.

Chemistry.

The work in Chemistry consists in daily recitations upon the study of both organic and inorganic chemistry as is laid down in Storer & Lindsay's Chemistry.

The object sought in the study of Chemistry is to familiarize the student with chemical phenomena and to use the knowledge in explaining the changes that result from physical forces.

In addition to the recitation on the text, a list of experiments recommended by the Committee of Ten for Secondary Schools is followed as far as practicable.

Botany.

Botany is studied with a view of obtaining a knowledge of the form, structure and habits of plants. The order of procedure in the development in organ tissue, cells and protoplasm.

A compound microscope is used in the examining of seeds, germination, stem, root and leaf.

The value of field work is recognized by requiring a search for plants of the vicinity and the making of an herbarium of at least twenty-five plants with anlysis. Every effort is made to stimulate independent investigation, and to have the note books and herba-

riums express truthfully and clearly what is seen. The text used is Wood's Botanist and Florist.

Astronomy.

The work in Astronomy embraces an outline of the celestial sphere and its circles, a description of the constellations, the problems of latitude and longitude, and descriptions of the earth, moon and sun in relation to size, density, motions, etc.

Text—Young's Lessons in Astronomy.

Department of Mathematics.

The course in this department comprises the following subjects: Mental Arithmetic, one term; Book-keeping, one term; Algebra, five terms; Geometry, one year; Trigonometry, one term.

Arithmetic.

In the Senior year the work in this branch includes explanations of arithmetical processes, principles and definitions, and their application in practical work, so as to enable the student to impart successfully to others that which he has learned.

The aim is to secure accuracy and rapidity and to develop the reasoning power of the student; also to develop the rules of operation by careful analysis, and to show the unity of the subject, the operations in fractions are reduced from the principles in division. Thoroughness in elementary principles is insisted upon in all the subjects.

In all this work the end is kept constantly in view that the members of the class are to become teachers of youth and must in turn present the subject to their pupils in the best possible manner.

Brook's Mental Arithmetic is used for one term in which mental discipline and cultivation of arithmetical power are its two-fold aim.

Book-keeping.

The work in this branch embraces drilling in characters and abbreviations used in business, study of commercial terms, practical work in business forms ,such as writing receipts, orders, bill, due-bill, notes, checks, drafts and business letters. More attention than usual is given to the above subjects, as many have no opportunity to gain such knowledge except by an experience that comes too late.

The exercises for each day's work in the different forms in both single and double entry are given by the teachers.

Each student who completes the course in book-keeping is

Composition Classes of Mr. Lough and Mr. Waddell

required to fill out a set of blanks with practical examples, illustrating the different forms in which books are kept.

Text—Bryant & Stratton's Single and Double Entry Book-keeping.

Algebra.

The study of Algebra has both a practical and disciplinary value.

On its practical side we find that we can apply the principles of Algebra to many difficult mathematical problems, thus rendering them easy of solution.

Among special subjects considered are factoring, which develops the ability of the student to combine and separate quantities; equations, which lead the student to investigate and reach different conclusions; the theory of exponents, which gives a clear insight into the relative value of quantities; the exposition of radical quantities, which stimulates the reasoning faculties of the mind.

The last term's work in Algebra begins with progression and embraces the subjects of imaginary quantities, logarithms and the binomial theorem.

To complete Algebra the student must know how to explain the principles as well as to solve the problems.

Milne's Algebras are used as texts.

Geometry.

The work is begun by requiring the pupil to observe the geometric forms and to construct them until the definitions, axioms, postulates, become firmly fixed in the mind of the student, as these are the basis upon which the science is built.

The fundamental theorems in each department of the branch are used to shape the methods of thought and facilitate acquisition. After being well grounded in the fundamental theorems, the student is given a large number of theorems, for which he is required to give original demonstrations; thus the able student will gain power enough in large part to construct his own geometry. The application of the principles of geometry to mensuration is made a special feature of the last term.

Text—Milne's Plane and Solid Geometry.

Plane Trigonometry.

This branch of mathematics has been added to the regular Normal course. The work includes the elements of Plane Trigonometry and is intended to assist the student in his comprehension of the sciences. Crockett's Trigonometry is the text used.

FAIRMONT STATE COLLEGE LIBRARY

Department of History.

The work in this department comprises one term in United States History, one term in General History, one term in Grecian History, one term in Roman History, one term in English History, one term in Mediæval History, one term in Modern History, one term in Civil Government, one term in Constitution and one term in Economics.

The work in these branches is carried on not only by the use of the text-book, but also by an extensive use of the library, the idea being to implant in the student a fondness for history from a philosophic rather than a chronological standpoint, and to show him the close connection existing between history and literature.

All facts are learned only as a means to an end, this end being the cultivation of sound judgment and the development of those powers in the pupil which will best serve him in after life. History is adapted as a culture study by giving such concepts of human life and action as will impress upon the thoughtful student the effects of environment and character building, first upon the individual, and through him, upon the race.

For the purpose mentioned and by way of comparison, especial attention is paid to the study of the history of Greece and Rome, England and America.

The school library is well supplied with historic literature; histories for comparative reference, novels and juvenile works upon historical subjects.

In addition to text-book work the student is also given topics to develop from outside sources.

United States History.

The plan recommended by the Committee of Ten, that an intensive study of some period of history be followed has been adopted, and the topics recommended by the Committee will be used as far as practicable.

The outline in this branch is intended to present the development and growth of America from its discovery to the present time.

It embraces the periods of discovery, settlement, colonization, revolution, etc. In connection with the history, biographical interest is awakened by short sketches from the lives of the great statesmen.

The study of the institutional life of the country is considered of primary importance, as it is the knowledge that will best serve the pupil in after life.

To this end the student is encouraged to express his own ideas

in connection with what he has gleaned from reading or any outside sources, and an endeavor is made to show him how the questions that present themselves to the people of this country are the direct effect of past causes, and how, in general, each cause has its corresponding effect.

The objects and methods of teaching are also discussed and exemplified. MacMaster's U. S. History will be used as a text.

General History.

One term is devoted to General History. Special attention is given to the development of government and civilization.

Text—Swinton's Outlines of General History.

History of Greece.

The History of Greece is one of the most interesting, attractive and culture-giving of the history of any nations. An acquaintance with its historians, orators, and philosophers forms no small part of a liberal education. We study Grecian history primarily on the philosophic side, that we may learn the influence it has had on the world's history. Text—Botsford's History of Greece.

History of Rome.

In Roman history, the character, manners, and customs of the people and the lessons that we learn from their successes and failures are impressed upon the student. Morey's Outlines of Roman History is used as a text.

English History.

The history of England is of primary importance to the American people, since we obtain our laws, customs and government largely from England. The Saxon conquest and the introduction of the Teutonic language, customs and institutions, the Norman conquest, language, thought and government. The Magna Charta obtained from King John and its effect on government. The revival of learning and the reformation. Elizabeth's brilliant and successful reign, including the colonization of America, are topics that are fully discussed. Montgomery's English History is used.

Mediaeval History.

The chief aim of mediæval history is to show the marvelous development of the barbaric nations concerned in the overthrow of Rome into the advanced and cultured people of Modern Europe.

Modern History.

Modern history directs the student's attention to those things which the past has contributed to the present, and enables him to appreciate and value the progress and emancipation of the marvelous nineteenth century.

Civics.

This course embraces the origin, nature, theory and necessity of government; the township, its origin and growth, as exhibited in the New England town, the Southern district, and the Western township; and its development into the county; the county into the colony, and the colony into the State; the origin of the Federal Union; the forms of governing the same under the Continental Congress, the Confederation, and the Constitution. Text—Willoughby's Civics.

Constitution.

Constitution offers an advanced course in Civics. Free use is made of the library, and subjects such as the following are investigated: "The Articles of Confederation," "The Ordinance of 1787," "Federalists and Anti-Federalists," "The Federal Executive," "Congress," etc. A great deal of stress is placed on the origin and development of the various parts of our government. Constant reference is made to Fiske's Civil Government, Bryce's American Commonwealth, Hinsdale's American Government, Fiske's Critical Period, Walker's Making of a Nation, Wilson's Theory of the State; McMaster's Schouler's, and Bancroft's Histories of the United States, and other books of much interest along these lines. The lives of such leaders as Washington, Hamilton, Jefferson, and Madison present a source of much reliable information concerning the "critical period" studied in this course.

Economics.

The course of instruction in this subject includes the study of the different stages in the economic life of civilized man, the industrial revolutions of England, the economic history of the United States, and the theories of production, exchange, distribution and consumption. Special attention is also given to public economics, and the relation of the State to private enterprise, embracing the subjects of private property and the State regulation of industry by taxation and positive statute. The principles of taxation and the sources of revenue are carefully studied in the light of their influence on economic conditions. The problems growing out of public expenditures, such as the care of the poor and unfortunate, and the

outlays for education and security to life and property are discussed from the economic standpoint. Such current questions as socialism, State management of industry, profit-sharing, coöperation, trades unions and pauperism are made subjects for special study and research. The aim of the instruction throughout the course is to give the student a clear knowledge of the fundamental principles of economic life, and a broader conception of man in the universal pursuit of getting a living. A thesis on some current economic subject of at least twenty pages in length is required of each student taking this course. Text—Laughlin.

Department of Ancient Languages.

Latin.

Three years of Latin are offered, of which students in the Normal Course are required to take the first two years (Terms 1-6).

It is the aim of this department to give such instruction in Latin as is required for entrance by the leading colleges and universities of the country. The courses offered are especially designed to correspond to the work of the same grade done at the State University.

The work of the first year includes a thorough drill in the forms of inflection and the essentials of syntax combined with the acquirement of ease and correctness in the translation of easy prose into English and English into Latin as an adequate preparation for the work of the second year. Throughout the course emphasis is laid on the acquirement of a large vocabulary and the habit of deriving English words from the Latin, thus enabling the student to receive important practical benefits from the study of the language in addition to its value as a mental discipline. Attention is also paid to Roman and Greek Mythology and the influence it has had on our literature. The work of the three years is arranged as follows by terms:

First Year.

Term 1. Smiley and Storke's "Beginner's Latin Book," lessons 1-30.

Term 2. Smiley and Storke's "Beginner's Latin Book," lessons 31-60.

Term 3. Smiley and Storke's "Beginner's Latin Book," completed. The work of this term will be supplemented by the reading of selections from the first book of Cæsar, or easy prose selections from Collar, Daniell, and Dooge's "Second Year in Latin."

Note.—Terms 1, 2, and 3 above are the equivalent of Courses 1, 2and 3 at the University.

Second Year.

Term 4. Cæsar's Gallic War (Books I. and II. or an equivalent in the same text). Course 4 at the University.

Term 5. Cæsar's Gallic War (Books III. and IV. or an equivalent in the same text). Course 6 at the University.

Term 6. Cicero's First and Second Orations against Cataline. Course 7 at the University.

Third Year.

Term 7. Cicero's Third and Fourth Orations against Cataline; and the Oration for Archias. Course 9 at the University.

Term 8. Virgil's Aenaeid (Books I., II., and III.). Supplemented by a study of Greek and Roman Mythology. Course 10 at the University.

Term 9. Virgil's Aenaeid (Books IV., V., and VI.). The study of Greek and Roman Mythology continued in connection with the text. Course 11 at the University.

Texts—The Revised Editions of Allen and Greenough's and Harkness's Grammars are used in Terms 4-9. Harper and Tolman's "Cæsar," Harper and Gallup's "Cicero's Orations," Harper and Miller's "Aenaeid," or other good texts are used. In terms 8 and 9 Guerber's Myths of Greece and Rome," and Gayley's "Classic Myths" will be used.

Greek.

The work in Greek gives such preparation as is required for entrance to the leading colleges and universities, and the two years offered in this subject are arranged to correspond to the two years' preparatory Greek taught at the State University. A thorough drill is given in the inflections, the formation of words and the essentials of syntax during the first year. In the second year the aim is to inspire the student with the love of Greek literature and thought, to arouse an interest in Greek life, and to beget in him the ability to read and appreciate the language as a type of the best literature. The two years' work is arranged by terms as follows:

First Year.

Term 1. White's "First Greek Book" (Chapters I-XL).

Term 2. White's "First Greek Book" (completed).

Term 3. Xenophon's Anabasis (Book 1). Prose Composition once a week.

Texts—Goodwin and White's "Xenophon's Anabasis," Goodwin's "Greek Grammar," and Pearson's "Greek Prose Composition."

Note.—The above three terms are the same as Courses 1, 2, and 3 at the University.

Second Year.

Term 4. Xenophon's Anabasis (Books II., III., and IV.). Prose Composition once a week. Texts—Same as Term 3. Course 5 at the University.

Term 5. Lysias' Orations. Prose Composition once a week. Collateral reading in the library. Course 6 at the University.

Term 6. Homer's Iliad or Odyssey (Books I., II., and III. Special attention to Greek Mythology. Seymour's "Iliad." Collateral reading: Jebb's "Introduction to Homer;" Gladstone's "Time and Place of Homer." Course 7 at the University.

Department of Modern Languages.

The Board of Regents has recently made German and French a regular part of the established curriculum. Two years' courses in each are offered.

The first year's work embraces principally drills in the accidence, simpler forms of syntax and conversation, together with an introduction to the less difficult gems in the literature of the fundamental elements of their grammars, and of a good working vocabulary.

The second year will embrace a somewhat extensive course of instruction in their syntax, history, and more especially their literatures. The instruction is by recitation in, and citations from, approved text-books. Frequent exercises in translations of English into these languages are also required in both years' courses.

Students who expect to enter this department must have a thorough knowledge of the elements of English grammar, and should preferably have completed at least a year of Greek or Latin, although German is taken as a substitute for Greek and French for Latin.

The work by terms is arranged as follows:

FRENCH.

FIRST FRENCH.—Five recitations a week throughout the year.

Fall Term: Whitney's Grammar, easy conversation.

Winter Term: Whitney's Grammar completed to Part II., Super's Reader finished.

Spring Term: Madame Therese or other selections from Modern authors.

SECOND YEAR FRENCH.

Fall Term:

1. Le Chien de Brisquet and L'Abbe Constantin.
2. Grammar, Part II.

Winter Term:

1. Victor Hugo's La Chute.
2. Moliere's Le Bourgeois Gentilhomme.
3. Exercises in Composition.

Spring Term:

1. Racine's Athalie and other selections.
2. Easy dictation and conversation.

GERMAN.

FIRST GERMAN.—Five recitations a week throughout the year.

Fall Term: Thomas' Practical Grammar, easy conversation.

Winter Term: Grammar completed to Part II, Harris' German Reader.

Spring Term: Immensee, Geischichten vom Rhein.

SECOND YEAR GERMAN—Reading and Composition.

Special Classes in Spring Term.

Many teachers of experience desire to spend one term in reviewing certain subjects which they are required to teach, or in pursuing certain professional studies, and yet are precluded from taking an extended course of study in any institution. Some of these are the leading teachers in their respective counties. They are prevented from pursuing a systematic course of study by being under the necessity of teaching during the fall and winter. For the benefit of these, special classes will be organized, if necessary, in U. S. History, Physiology, Theory and Practice, Civil Government, Bookkeeping, Arithmetic, Penmanship, General History, etc.

Text Books Used.

Below is given an exhibit of the character of the subject matter, list of text books used, and time in which they should be completed.

PREPARATORY DEPARTMENT.

Arithmetic, Practical, Milne's Standard: Two terms.
Bookkeeping, Bryant & Stratton: One term.
Grammar, Harvey: Two terms.
Geography, Frey or Natural: Two terms.

Composition Classes of Mrs. Gardiner and Miss Potts

NORMAL AND ACADEMIC DEPARTMENTS.

Algebra, Milne's Elements: One term.
Algebra, Milne's Academic: Four terms.
Arithmetic, Mental, Brooks: One term.
Astronomy, Young: One term.
Botany, Wood: One term.
Chemistry, Storer & Lindsay: One term.
Civics, Willoughby: One term.
Constitution, Fisk. One term.
Ethics, MacKenzie: One term.
Economics, Laughlin: One term.
English, Higher, Reed & Kellogg; Two terms.
French, Whitney, etc: Six terms.
Greek, White, etc: Six terms.
Geography, Physical, Davis: One term.
Geology, Le Conte: One term.
Grammar, Reed & Kellogg: One term.
German, Thomas, etc: Six terms.
Geometry, Milne: Three terms.
History, U. S., MacMaster: One term.
History, Grecian, Botsford: One term.
History, Roman, Morey: One term.
History, English, Montgomery: One term.
History, General, Swinton: One term.
History, Mediæval. One term.
History, Modern. One term.
History of Education, Compayre: One term.
Literature, English, Halleck: Two terms.
Literature, American, Hawthorne & Lemon: One term.
Latin, First year, Smiley & Storke: One year.
Latin (Second year): One year.
Logic, Davis: One term.
Music, Nat. Music Course. Two terms.
Orthography, Reeds' and Irish: Four years.
Physics, Avery: Two terms.
Psychology, Halleck: Two terms.
Physiology, Overton: One term.
Pedagogy, Boyer: One term.
Rhetoric, Quackenbos: Three terms.
Theory and Practice, Page: One term.
Trigonometry, Crockett: One term.
Zoology, Holder: One term.

Department of Music.

Miss Sarah Maxwell, Teacher.

Music, generally speaking, is too apt to be regarded as a mere empty accomplishment. Consequently the time devoted to it is limited, and the knowledge attained superficial.

Experience has taught us that with no very extraordinary gifts, provided there is sufficient general intelligence, every one can accomplish something in music. Many are endowed with natural taste, correct ear, and poetical sentiment who may never have the opportunities necessary to make great artists. These are, however, capable of comprehending and interpreting good music. If only those who are capable of becoming great artists were taught music, we would loose one of the chief sources of recreation, and music unlike many other amusements, leaves no sting in its trail.

"To neglect the ear while we train the eye is to discriminate unfairly against one of the chief senses. To educate a child and not train him in music, is to give him a one-sided culture. He is not a complete man; he is defective; incapable of appreciating the marvelous and inexhaustable beauties of sound; unable to express his feelings in the most expressive way; shut out from sympathetic companionship of those more favored than himself, he has been robbed of his birthright."—From Morgan's "Studies in Pedagogy."

Superior advantages are offered to all who wish to study Piano, Organ, Voice Culture and Sight Singing. A course is offered which is designed for teachers in Public School work. It includes: Ear Training, Tone Production and Sight Singing. During the year opportunities will be given pupils to appear in public.

The tuition for private instruction, on Piano or Organ, is ten dollars per term of twenty lessons, payable half at the beginning and the balance at the middle of the term, and no deduction is made for absence except in case of illness.

Department of Oratory, Elocution, and Physical Culture.

Ida Maude Page, Teacher.
Graduate of Emerson College, Boston.

"The orator is educated by the quickening and developing of all the intellectual faculties, cultivating the imagination, deepening and guiding the feelings, disciplining all the agents of expression, making the will sovereign, and then leaving him free to express his thoughts, convictions and emotions in accordance with his own temperaments." The personal and literary culture afforded by this training is of the highest value to men and women in every walk of life. "When a man loves the truth and lives it, and can present it effectively to others, he has received the best possible preparation for the work of life as well as for the work of oratory."

The system of physical culture taught preserves and develops health and gives grace and beauty to the body, which produces greater vigor of mind.

Attention is also given to the strengthening and culture of the speaking voice. Stammering, lisping and other defects of speech may be overcome by the application of the principles taught.

GENERAL INFORMATION.

Location.

Fairmont is a growing city in Marion county, seventy-seven miles east of Wheeling, twenty-two miles from Grafton and thirty-three miles from Clarksburg, having the Baltimore & Ohio, the Fairmont, Morgantown & Pittsburg, and the Monongahela River Railroads passing through it. It is situated on the banks of the Monongahela river, in the midst of a landscape of surpassing beauty and lovliness. Its population is intelligent and moral, and disposed to extend to students coming among them all the kindness and attention demanded by Christian courtesy and culture.

Nearly all the Christian Churches are represented, and the students are cordially welcomed to all their services.

History.

The Fairmont State Normal School owes its existence to the beneficence of the citizens of Fairmont and vicinity, and to the Legislature of West Virginia. A bill proposing the establishment of a State Normal School at Fairmont was introduced in the Legislature of 1865-6, but the session adjourned without passing it. Meanwhile the citizens of Fairmont formed a joint stock company under the title of "The Regency of the West Virginia Normal School," and secured a charter. A lot was purchased and the wing of the present public school building, 68 by 40 feet, and two stories high, was commenced in the summer of 1867, but before its completion the Normal School passed under the control of the State.

In February, 1867, the Legislature voted $5,000 to the Fairmont Normal School on condition that $2,000 additional be paid by the citizens of Marion county, the State agreeing to make the same a State Normal School, and to finish and furnish the same, and to open a school therein without delay; whereupon the incorporators, in consideration of $2,000, transferred all their interest to the State.

On February 11, 1872, the Legislature passed the following bill: "That the sum of $5,000 is hereby appropriated out of all the moneys in the treasury, to be expended under the direction of the

Regents of the State Normal School at Fairmont, but no part of the sum hereby appropriated shall be drawn from the treasury unless and until the Board of Education of the district of Fairmont shall pay into the treasury of the State the sum of $5,000, which shall be added to the sum hereby appropriated, the whole constituting a fund of $10,000 to be paid out of the treasury and expended as aforesaid."

By virtue of the last named act, the district of Fairmont claimed to have acquired an equitable interest in the said building, and the two schools occupied the building until 1891, when the growing needs of the Normal School demanded more room. It was decided to petition the Legislature to sell the present Public School building to the District of Fairmont for the sum of $12,000, and also to appropriate $20,000 additional for the erection of a new Normal building.

The bill was passed on the 9th day of March, 1891, and provided for the sale of the old building for $15,000, and appropriated $20,000 additional for the erection of a new Normal building.

In February, 1892, at the City of Charleston, the contract was let for the construction of the present Normal building, and on June 14th the corner-stone was laid by the Masons with imposing ceremonies. On March 27th, 1893, the school formally took possession of the new building, with an interesting program of exercises.

In February, 1895, the Legislature appropriated the additional sum of $12,000 for the completion of the building, by adding the wing which had been contemplated in the original plans. This wing has been completed and furnished.

Building and Grounds.

The building is constructed of red brick with stone sills and lintels. It is well proportioned and presents a grand and imposing appearance. It has a frontage of 100 feet, with a depth of 150 feet.

The basement contains gymnasium rooms for ladies and gentlemen, janitor's room, storage rooms and rooms for the heating apparatus. The first story contains six large class rooms, a small class room, an apparatus room, an office and two cloak rooms, and five flights of stairs to the second story and basement.

The second story contains a beautiful new chapel and study hall, nine large class rooms, two offices, library, cloak room and ladies' parlor. The third story contains the large auditorium, one of the finest assembly halls in the State, capable of seating one thousand persons, and two splendid society halls. There are also two dressing rooms on this floor supplied with lavatories.

The building is finished throughout with West Virginia pine and presents a very pleasing effect. It is ventilated by the Bennett

Composition Classes of Mr. Mercer and Miss Abbott

& Peck system, and heated by a new steam plant. The outside steps and platform are Cleveland sandstone with ornate buttresses and trimmings. The entrance to the building from Fairmont avenue is adorned with a handsome vestibule which contains an ornamental steel ceiling. A Howard clock with dials eight feet in diameter adorns the tower. This elegant edifice is placed upon a most beautiful location in what is known as the South Side of Fairmont. The grounds have been recently graded and terraced and a splendid stone wall runs the entire length of the grounds along Fairmont avenue, Second street and Gaston avenue. Arbor Day was fitly observed this spring, and a number of trees were planted upon the grounds.

This building is the most complete and commodious of any single school building in the State. A cut of the complete building may be seen on the second page of this catalogue.

Principals.

Prof. W. R. White was the first principal of the school after it passed under the control of the State in 1868, and continued such until 1870, when he resigned. He was succeeded by Prof. J. C. Gilchrist, who was principal until 1871. Rev. J. G. Blair, LL. D., was then appointed principal, which position he occupied until his death, December 22, 1878. Miss M. L. Dickey succeeded Dr. Blair, as acting principal, continuing as such until 1881, when she resigned and was succeeded by Prof. Ulysses S. Fleming as acting principal until 1883, when the Regents chose as principal Conrad A. Sipe, A. M., who resigned August, 1889. The Regents then appointed Miss N. R. Cameron acting principal, who resigned in June, 1890, and John H. Roemer, A. M., was principal for 1890-91. J. C. Gwynn was chosen as principal in September, 1891, and continued as such until July, 1892, when the Regents chose as principal J. Walter Barnes, A. M. He was succeeded in July, 1901, by M. M. Ross.

Faculty and Students.

The members of the Faculty are graduates of Universities, Colleges and Normal Schools, who have had unusually successful experience in school work. Each has been assigned a special line of work to which he is peculiarly adapted.

The students who enter the Fairmont Normal School are a superior class of young people who come to the Normal School for a definite purpose. Each holds himself to a high standard of conduct.

Suggestions.

Students will please remember:

1st. That they are ladies and gentlemen.

2d. That good order is indispensable to the best work.

3d. That there should be a definite time for study, for exercise, for meals and for sleep.

4th. That there should be no talking or laughing in the class rooms, library or chapel.

5th. There should be no gathering in groups, or promenading on the streets, or absence from rooms during study hours.

6th. Students should retire not later than 10:30 P. M.

7th. That absence and tardiness should never occur except in case of illness.

8th. That politeness, generosity and industry are always appreciated.

9th. That regular attendance at Sunday School and Church services is a duty of the highest importance.

10th. That keeping company with the opposite sex is as a rule inconsistent with strong work in the school.

11th. That no student will be allowed to absent himself from recitations or examinations.

12th. Do not be too anxious to enter advanced classes. There will be no time to make up back studies.

13th. Come expecting to work faithfully and honestly, prepared to make any sacrifice for your own good and for the good of the school.

14th. Bring with you as useful for study or reference all the text-books you have.

15th. Do not attempt to complete the prescribed course of study unless you have good bodily health, and having this do not jeopardize it by practicing the false economy of living without sufficient or suitable food or necessary comforts.

FACILITIES FOR WORK.

"The true university is a collection of books."—Carlyle.

Library.

The Alumni library started about twenty years ago by the Alumni Association formed the nucleus of the present Normal Library. A large number of volumes have been added during recent years until now it contains over three thousand volumes, and is especially complete in the departments of Pedagogy, History, Literature and Economics.

The use of the library is facilitated by a card catalogue containing the title of every book and the name of its author. Great care has been taken in the selection of books; and the use of them made by the students shows that the collection has been well chosen. The number of reference books is unusually large.

On the second floor near the principal's office is a well lighted room, which is fitted up for a library and reading room. It is furnished with cases, reading tables and easy chairs. The library is open each evening from 2:00 to 4:00 P. M. Students are permitted to take books for home use, but no one shall have more than two books at the same time without special permission, nor retain any book more than two weeks without renewal.

Public Documents.

Through the efforts of Hon. Wm. L. Wilson, this school was designated as a depository of public documents; accordingly all valuable and important works issued by the departments of the government are forwarded to the library. This will continue to be the depository, as it has been so designated by Hon. A. G. Dayton, Member of Congress from Second Congressional District.

Current Literature.

Leading articles in the magazines are reported on in the several composition classes, and the students are required to

read articles assigned by the teachers. In this way public questions are thoroughly discussed. Current topics in newspapers are also reported from week to week.

Reading Room.

An excellent reading room is maintained for the school and many of the leading periodicals are furnished, among which are the following:

Monthly.

American School Board Journal.
*American Education.
*Atlantic Educational Journal.
Atlantic Monthly.
Century.
Cosmopolitan.
Cumulative Index to Periodicals.
Current Literature.
Education.
Everybody's Magazine.

***Furnished free by the publishers to whom thanks are returned.**

Literary Societies.

Two literary societies, the Mozart and the Lyceum, are connected with the school. Both ladies and gentlemen become members of each society. Students are not compelled to join a literary society, but they are advised to do so. A literary society, properly conducted, supplies some features in education that are not likely

to be supplied by any other agency. Although a rule adopted by the Regents gives the Faculty control of the literary societies, yet this control is largely delegated to the members, and they elect their officers, assign performances, punish their own members for neglect of duty, and conduct the affairs of the societies generally, the Faculty having such control and oversight as will prevent any individual from being wronged, the time wasted or the school injured by any improper conduct.

The annual contest between the Normal Lycem and Mozart Literary Society is unusually interesting each year owing to the fact that a silver wreath, presented by J. Willis Smith, a former student of the school, to the winning society, is contested for annually. The Mozart Literary Society won the wreath in 1899 and the Normal Lyceum in 1900, and again in 1901.

Each society chooses its best material for the contest, and the Normal Auditorium is crowded to its fullest capacity on the evening of the contest.

Inter-Normal Contest.

Prof. A. J. Wilkinson, a prominent graduate of the Fairmont Normal School, class of 1884, has offered to the Normal students an opportunity to compete in oratory by offering two prizes. First prize, $25 in gold; second prize, Webster's Unabridged Dictionary. In 1898 he offered a prize to the member of the senior class of any of the Normal Schools who would write the best application for a school. This prize was won by Miss Hallie Swan, of Tyler County, a graduate of the Fairmont Normal School.

On the evening of April 8, 1899, in the City of Parkersburg, the Inter-Normal Oratorical contest was held, and the first prize was won by Mr. Tusca Morris, of the Fairmont Normal School. April 26th, 1900, witnessed the third oratorical contest at Clarksburg. Shepherdstown Normal receiving first honors.

The fourth Inter-Normal contest was held in the City of Charleston, February 9th, 1901, the representative of the Athens Normal School winning first place.

The fifth annual contest was held April 5, 1902, at Grafton, in which J. C. Bond, a student of this school, won first prize giving Fairmont three first prizes in five contests.

ALEXANDER PRIZE CONTEST.

In 1899, Mr. G. M. Alexander, Prosecuting Attorney of Marion County, offered a prize of $15.00 for excellence in Elocution and Oratory to be contested for within commencement week, divided as follows: In recitation, first prize $5.00, second $2.50.

In Select Oration, first prize $5.00, second $2.50.

The winners in 1901, were, in recitation Miss Willa Hickman first prize, and Miss Isa Hawkins second prize.

In Select Oration J. Walter Reeves won first prize, and J. C. Bond second.

THE CLAYTON PRIZE CONTEST.

In the fall term Hon. U. A. Clayton, Ex-Gov. A. B. Fleming and Mr. Geo. DeBolt offered the sum of fifty dollars to be distributed in prizes in the Department of Elocution and Oratory.

This amount was divided as follows:

Ist. $20.00 for the best in declamation open to any student, either lady or gentleman.

2nd. $30.00 to be divided among contestants who had never won prizes in Oratory—$10.00 first prize, and $5.00 second, for ladies, and $10.00 first prize and $5.00 second for gentlemen.

These contests were held March 17th and 18th, 1902. In the first contest Miss Lelia Hess won first prize of $20.00, and through the generosity of Hon. S. H. Bowman a second prize of $10.00 was given, which was awarded to Miss Willa Hickman.

In the second contest, for the ladies, Miss Pansee Ramage won first prize of $10.00, and Miss Goldie Mae Riggs second prize of $5.00.

For the gentlemen, Mr. H. H. Dean won first prize of $10.00, and E. B. Harden second prize of$5.00.

Owing to the excellence of the contest, Hon. Harry Shaw one of the judges supplemented the above prize by $5.00 to be divided equally between Miss Lucy Rogers and Mr. Harry McCloy as third prize.

GYMNASIUM AND ATHLETICS.

The Gymnasium is well supplied with apparatus consisting of striking bags, chest machines, dumb bells, Indian clubs etc. Outdoor exercise and games are encouraged and a uniformed base ball team has been organized which has sustained itself creditably in several match games. Besides the first team two other clubs have been formed, and this most popular of outdoor sports furnishes recreation for a large number of students.

A lawn tennis outfit, tether ball and croquet set, have been purchased for outdoor play for the young ladies, and suitable and popular indoor games provided for cold weather.

It is believed that such pleasurable recreation judiciously indulged in will prove of great value.

Much interest has been evinced in all these sports by the students and excellent results have followed.

Moral Culture.

This school is strictly a State institution, and as such is in every respect unsectarian. It esteems sound morality, obedience to truth and virtue, and a courteous regard for the opinions of others as matters of paramount value. Everything that would contaminate the moral character, incur reproach or weaken virtuous habits, is carefully guarded against. There are eleven churches in town, with regular Sabbath service, each having prosperous Sabbath Schools, and other Christian organizations. Students are cordially welcomed to these privileges. All students are required to be present at the chapel exercises of the School each day.

Abundant opportunity presents itself in the life of the School for the testing of the moral character and the exercising of those virtues which are indispensable to the teacher. The cultivation of such qualities as industry, self-denial, earnestness, and generosity is as important to the student as the development of the mental powers. The intercourse between students and teachers is characterized by sympathy and mutual helpfulness.

Moral Requisites.

While as a State School this institution is wholly secular and its instruction has no reference to religious, sectarian or political dogmas, yet it is designed to inculcate the principles of good citizenship and honorable manhood. Each student is treated as a gentlemen or lady and expected to exhibit a corresponding deportment.

No pupil can continue in this school on other conditions. It is expected that all students properly observe the Sabbath and attend church on that day with some one of the congregations of the town. No immoral, profane or dissipated person can remain a member of the institution. Parents need have no fear in this respect in sending their children to this school.

Government.

The government of the school involves three elements:

1. It is wrong not to do wright.
2. The culture of a high sense of personal honor.
3. The highest style of government is self-government.

Students who will not govern themselves cannot hope, as teachers, to govern others. Each pupil is put upon his honor.

The endeavor of the Faculty is to enforce strict discipline in all departments of the school. The aim being to secure this by an appeal to the honor of the student, but in case of failure to secure

the desired end in this way, the Faculty will not hesitate to enforce prompt obedience to all rules and regulations. Those who do not conform cheerfully to all requirements will be permitted to withdraw or be dismissed from the school.

Sessions of School.

There is one session a day, beginning at 7:30 A. M., and closing at 12:20 P. M. Study hours are two hours in the afternoon and from 7 to 10 in the evening. Students are required to be present at the chapel exercises each morning at 9:30 o'clock and to observe study hours as above.

Examination.

Pupils shall attend all required examinations of the year, and no pupil shall be permitted to advance who does not attain a standing of seventy-five per cent., including class standing and examination.

Normal pupils who fail to make a standing of seventy per cent. shall forfeit their State appointment at the end of the term.

These examinations shall be in writing, or partly written and partly oral, and shall be conducted by the instructor in charge, under the supervision of the Principal. The examinations are held at such times as the faculty may direct.

Pupils applying for Normal Diplomas shall complete their examinations two weeks before Commencement.

All students who pass examination on a branch and obtain a standing of seventy-five per cent. shall be entitled to a pass certificate which precludes the necessity of further examination on that branch.

Diplomas.

Any person who completes the required course of study and who is of good moral character, will receive a diploma which shall entitle him upon application, without examination, to a State Certificate, good for six years, provided, he shall present satisfactory evidence to the State Board of Examiners that he has taught successfully three years in the State under a Number One County Certificate, two of which said three years shall immediately precede the application for such certificate. When the holder of this State Certificate shall present to the Board satisfactory evidence that he has taught successfully four years under this certificate, he shall be entitled to receive without examination a certificate good for twelve years. These certificates are valid in any school in the State, and are equivalent to a Number One County Certificate.

Base Ball Team 1902

Conditions of Graduation.

Satisfactory examinations shall be passed on all the branches required by the Course of Study. A thesis upon some educational subject shall be required of each candidate for graduation. Also a Commencement Oration is required.

CLASS HONORS.

By an action of the Faculty of last year the following resolution was promulgated:

"All graduates having attained a general average above 95 per cent. are entitled to first honors; those obtaining from 90 per cent. to 95 per cent are entitled to second honors."

The following members of the class of 1901, are entitled to first honors: C. M. Bond, L. H. Hayhurst, J. G. Prichard, W. S. Browne, I. C. Gibson and Addie Eliason.

The following are entitled to second honors: Geo. L. Kerr, J. S. Coughlan, Alberta Odbert and Alberta Ramage.

Standard of the School.

It is the purpose of the Board of Regents and Faculty of the School to maintain a high degree of scholarship and professional training, so that those who complete the course shall be well prepared for the work of teaching.

Positions for Teachers.

This school does not provide positions for its graduates or undergraduates, but it will aid them in securing places whenever it is possible. Trained teachers are always in demand. We have many inquiries for good teachers at excellent salaries, and during the past year a larger number of our students were engaged in teaching than ever before, and yet we had calls which we were not able to supply.

Normal Appointees.

The number of students which each county in the State shall be entitled to appoint to the State Normal Schools, free of charge for tuition, shall be as follows:

Barbour	90	Doddridge	90
Berkeley	138	Fayette	150
Boone	56	Gilmer	71
Braxton	151	Grant	48
Brooke	48	Greenbrier	135
Cabell	168	Hampshire	80
Calhoun	63	Hancock	52
Clay	33	Hardy	50

Harrison	150	Pendleton	63
Jackson	143	Pleasants	56
Jefferson	112	Pocahontas	53
Kanawha	315	Preston	143
Lewis	112	Putnam	108
Lincoln	82	Raleigh	70
Logan	40	Randolph	82
Marion	143	Ritchie	123
Marshall	143	Roane	112
Mason	168	Summers	93
Mercer	120	Taylor	90
Mineral	93	Tucker	82
Mingo	31	Tyler	90
Monongalia	120	Upshur	93
Monroe	83	Wayne	143
Morgan	48	Webster	40
McDowell	56	Wetzel	123
Nicholas	68	Wirt	67
Ohio	300	Wood	198
		Wyoming	40

Admission.

Any white person of proper moral character having sufficient preparation may be admitted to the school at any time. The age of applicants must be—males, not less than fourteen, and females, not less than thirteen years. It is desirable that all students enrolling shall have previously completed the Common School Course of Study, but Arithmetic, Physiology and United States History may be taught whenever, in the opinion of the Principal, such may be necessary, as evidence of completion of the Common School Course, the diploma or a first or second grade county certificate will be taken or the student can pass an entrance examination.

Upon entering school, the student will be placed in such class or classes as his attainments and ability warrant. Students desiring to enter the third or fourth year classes will be permitted to do so, provided they can pass a satisfactory examination in all the branches belonging to the preceding year.

Applications for appointments to the State Normal Schools should be made to the Superintendent of Free Schools of the county in which the applicant resides, or to the principal of the school which he desires to attend. You can secure the appointment after you come to school.

Every certificate of appointment to the Normal Schools of this State shall be directed to the School which the applicant may desire to attend. The County Superintendent making such appointment shall at once notify the principal of said School of such appointment. The Faculty of said School shall, subject to appeal to the Board of Regents, have power to annul any appointment or

certificate for non-attendance, inaptitude to learn, immorality or other good cause. In case of a certificate being thus annulled, the Faculty shall notify the County Superintendent, who issued the certificate, of such nullification; whereupon if no appeal is taken to the state Superintendent within twenty days after the action of the Faculty, he may make an appointment to fill the vacancy thus created. Every County Superintendent shall keep a record in his office of all appointments made by him.

Each appointee shall deliver the certificate of appointment to the Principal of the Normal School to which it is directed, and the Principal shall thereupon file it with the records of the school, and enter the name of such person on the register of Normal pupils.

FREE TUITION.

Tuition is free to all students holding appointments.

Other Expenses.

An incidental fee of $1.50 per term is charged. This fee is due at the time of enrollment and must be paid on entering.

A method called "Rooming" is very popular here both with the students and with the families who take boarders. It is this: The student pays so much for the furnished room and for the cooking, he supplying his own provisions. Whatever he provides is cooked, and his room is taken care of by the family as it would be were he boarding. By this method the cost is reckoned at about $2.25 to $2.75 per week, and the only inconvenience is the matter of providing.

Students who desire to board in clubs can reduce expenses to $2.25 per week by practicing economy. Board can be obtained at rates ranging from $3.00 to $3.50 per week, including room, fuel and lights. Two persons are expected to occupy one room. Those desiring to room alone can usually do so by paying a higher price.

Arrangements for board can be made better after arrival than by correspondence.

Visitors.

Visitors are made welcome at all times. Teachers and educators are especially invited.

We are also pleased to see patrons of the school, and are glad to have visitors at our Chapel Exercises, which commence at 9:30 A. M. The School belongs to the State. Show your interest in it by paying it an occasional visit.

Directions.

Those who contemplate attending a Normal School would do well to write us. Do not hesitate to ask questions concerning the

school; we like to answer them. When you have decided to attend our school, let us know upon what train you will arrive, and we will meet you at the depot. If you do not know in time to write, and arrive in town between the hours of 7 A. M. and 5 P.M., come to the school building.

Advantages Summarized.

We herewith present a few reasons why the youth of West Virginia, of both sexes, who desire an education that will fit them for business, college or teaching, should attend the Fairmont State Normal School.

1. It is easily accessible.

2. The healthfulness of the place and the sociability of the people are proverbial.

3. The Normal building is large, commodious, in thorough repair, provided with modern furniture, large blackboard surface, maps, library, lexicons, encyclopedias, physical and chemical apparatus, and musical instruments.

4. The Faculty is composed of graduates from the best schools in the country, who have added to their scholarly qualifications a varied and successful experience in teaching in both common and higher grade schools.

5. Thorough instruction in Instrumental Music and Voice Culture is given by one of the best teachers in the State.

6. In the Department of Elocution and Oratory thorough and systematic work is done by a specialist.

7. The school has an ESTABLISHED REPUTATION, and points with pride to the more than five hundred graduates, and to the more than three thousand teachers who attended one or more terms since its organization but did not graduate, who have been and are engaged in the profession of teaching, besides the many who fill positions of trust and profit in political, business and professional life, to show the place it occupies in public esteem. THE DEMAND ANNUALLY MADE UPON THE SCHOOL FOR TEACHERS IS GREATER THAN THE SUPPLY.

8. Tuition for pay pupils is lower than at any school of like grade in the country, being only $6.00 per term of thirteen weeks. State pupils, on appointment, go free.

9. Boarding is only from $2.25 to $3.50 per week. The necessary expenses need not exceed $40.00 per term of 13 weeks.

10. The Academic course of instruction includes those branches embraced in the preparatory schools of our best colleges and universities, among which are higher mathematics and ancient

languages, and those who complete this course will be admitted to the University classes without further examination.

11. A special feature is the literary work done by the students. The entire school is graded into classes, each one of which is under the direct personal care of one of the teachers. Opportunities for this work are also offered by the Literary Societies.

12. Particular attention is paid to the development of the social qualities of the students. The intermingling of the sexes in school and society work, where each one is held accountable to the law of personal honor and integrity, has been found to be productive of the most gratifying results. By these means the exercise of discipline has been reduced to the minimum, and the rule of self-government made supreme.

During the past year receptions have been held for the social benefit of the students. Upon these occasions the Faculty has been the receiving party, and they have been found to unite teachers and students much closer, as well as to render the students more intimately acquainted with one another.

THE ALUMNI.

This Association now numbers over five hundred members, over three-fourths of whom are engaged in school work in this and other states. No other influence has been so potent for good to the Fairmont State Normal School as that of her large body of successful and influential graduates. Through them has she been judged, is being judged, and is proud to be judged. Their loyalty is proverbial, their assistance vital, and their visits to the Normal always delightful to faculty and students.

The annual meeting will be held, June 19th, and all are cordially invited to be present.

Miss Alice Josephine Ohley is the President and has prepared an excellent programme for the meeting, consisting of an address by Howard N. Ogden, PH. D., LL. D., class of '77, President of The Illinois College of Law, a poem by H. L. Swisher, class of '92 President of The Acme Publishing Company, and select Recitations by Miss Alberta Ramage, '01, and Mr. C. L. Michael, '93.

Class of 1872.

Anna Belle Ayres (Mrs. O. S. McKinney), Palatine, Marion County. Present address, Fairmont. Taught three years.

Lucia M. Fleming (Mrs. F. E. Stewart), Fairmont, Marion County. Present address, Liberty, Nebraska. Taught nine years in the Fairmont Normal School.

Mamie Watson (Mrs. M. N. Barns), Fairmont, Marion County. Taught three years.

Hyre D. Clark, Buckhannon, Upshur County. Present address, Abington, Illinois. Minister and President of College.

The Fairmont Normal

When the free school system of the State was established with the adoption of its first constitution, the standard of education was low. The people had not fully emerged from the pioneer stage, and but a small part of the State's territory was then developed. It was necessary to secure her teachers from the adjoining States, Ohio and Pennsylvania. The need of teachers was so urgent that the educational leaders, foremost among whom was Prof. Wm. R. White, the first State Superintendent, and the first principal of this school, made early, strong and repeated effort to secure the establishment of training-schools to supply this demand. They finally succeeded and the present system of Normal Schools was established, "For the instruction and practice of teachers of common schools in the science and art of teaching."

The anticipations of the founders have been fully realized, the influence of the Normal Schools has been greater than any other in bringing about the great educational uplift of the State. And the influence of this school has been marked in this worthy cause.

Since the establishment of these schools there has been, and is still, a lack of high schools, and it has been necessary for them to do high school and academic work, as well as professional. This condition still exists. The work must still be done. But it is a condition common to all Normal Schools; and a comparison of our Course of Study with those of the best Normal Schools in the United States, will convince the most skeptical of our friends that our Normal Schools are worthy of the name.

It is true that much of the modern technique of training work was not demanded in the earlier years of their existence, and they are still somewhat deficient in this respect, but there was that in our Normal especially, which was far better, the soul to soul contact with great leaders, and the inspiration and longing for higher ideals born in the rugged mountain farm boy, because of this contact with those whose sympathies were broad, whose lives were

JUNIOR CLASS (TWO ABSENT)

noble and whose methods were worthy of imitation. A modicum of this still lingers in the "Old Normal Halls," we trust, an inspiration and incentive to the present generation and to generations yet to come.

But after all a tree must be judged by its fruits, and not by the environment for which it is not responsible. We challenge this judgment, and with the worthy matron of old point not boastfully but proudly to her many jewels, the hundreds of her graduates and the thousands of her old students, whose influence is felt throughout our State in every phase of its material and intellectual development, and to those whose lot being cast beyond her borders, have not feared to measure arms, and that successfully, with competitors from more pretentious institutions.

THE ACADEMIC DEPARTMENT.

In the Academic Department are taught all the branches required for admission to the State University, and pupils in this department are admitted upon the same terms and conditions and are entitled to all the privileges of the Normal pupils.

This department is equal in popularity to the Normal, and its graduates are admitted to the freshmen class of our State University and other institutions of like character without examination. In fact, the completion of the Academic Course entitles the student to advance standing in the University as the Normal School requires fifty courses and but thirty-nine are required by the Preparatory Department of the University.

Normal Course of Study

SCHEDULE BY TERMS.

FIRST YEAR.

NOTE—(1). Modern and Mediaeval History optional the senior year. (2). Orthography throughout the course. (3). Vocal Music to be provided for by the Principal. (4). Drawing to be provided for by the Principal.

Notice

The following course of reading will be required in each of the following subjects:

U. S. History.

Morse—Home Life in Colonial Days.

Longfellow's } Evangeline. Paul Revere's Ride.

Emerson's—"Concord Hymn."

Cooper's—"Last of the Mohicans."

Thomas Nelson Page's—"Red Rock."

General History.

Penfield's—"Present Day Egypt."

Guerber's—"Myths of Greece and Rome."

John Lord's Beacon Lights } Lectures { Caesar. Henry VIII. and Elizabeth Reformation.

Grecian History.

Guerber's—"Myths of Greece and Rome."

Blummer—"Home Life of the Ancient Greeks."

Gulick—"Life of the Ancient Greeks."

Diplomas

Upon those who have completed the full Normal or Academic Course with an average standing of 80 per cent., and not below 75 per cent., on any one branch, and have been in actual attendance during the entire fourth or fifth year, the Board of Regents will confer a diploma of graduation in the Normal or Academic department, respectively. But before any certificate or diploma is granted the Principal of the school will be required to certify that those whom he recommends for graduation have fulfilled all the conditions and done all the work required for graduation.

"The entire fourth or fifth year" shall mean in this connection one full year of three terms.

Those who graduate in the Academic course will be admitted to the Freshmen Class of the State University without examination.

Those who complete both the Normal and Academic Courses usually have no difficulty in securing advanced standing at the University.

Special Classes in Spring Term

Many teachers of experience desire to spend one term in reviewing certain subjects which they are required to teach, or in pursuing certain professional studies, and yet are precluded from taking an extended course of study in any institution. Some of these are the leading teachers in their respective counties. They are prevented from pursuing a systematic course of study by being under the necessity of teaching during the fall and winter. For the benefit of these, special classes will be organized, if necessary, in U. S. History, Physiology, Theory and Practice, Civil Government, Bookkeeping, Arithmetic, Penmanship, General History, etc.

Explanation of Course of Study

The following is a classification of the branches of study pursued in this school:

PROFESSIONAL.

Psychology, Pedagogy, History of Education, Ethics, School Management, Lectures an Methods of Instruction, and practice work in teaching during the Senior year. Such review of the common school branches as may be necessary will also be required.

ENGLISH.

Orthography, Composition, Grammar, Higher Lessons in English, Rhetoric, and English and American Literature.

ANCIENT AND MODERN LANGUAGES.

Latin, Greek, German and French.

SCIENCE.

Physical Geography, Physiology, Zoology, Botany, Astronomy, Geology, Physics and Chemistry.

MATHEMATICS.

Arithmetic, Bookkeeping, Algebra, Geometry and Trigonometry.

HISTORY.

American, English, General, Grecian, Roman, Mediaeval and Modern, Civics and Economics.

ART.

Penmanship, Drawing, Music, and Oratory.

Professional Department

Special preparation is necessary for success in every profession, and especially in one so far-reaching as the teacher's. He must know something of the material with which he works, its possibilities, its limitations, and its methods of growth; something of the science of education and the practical application of its principles, as well as the history of its development.

The professional studies are given below:

PSYCHOLOGY.

Psychology is the most important of the professional studies, and as such receives careful attention during the entire senior year. All true teaching must accord with the laws of mental development because the supreme end of education is mental and moral development. It is the special province of Psychology to deal with these laws and the periods and phases of mental growth.

The text used is that by Halleck, with constant reference to James, Sully, Dewey, Baldwin, etc. The library is well supplied with many of the latest and best books on the subject.

PEDAGOGY.

This study aims to give a thorough idea of the meaning of education, and a practical application of the knowledge gained in the study of psychology. It seeks to develop a mastery of the principles underlying good teaching, methods of conducting the recitation, preparing courses of study, etc. Boyer's "Principles and Methods of Teaching" is used as a text with reference to White, Putnam, Morgan and others. In connection with this study one term in

Theory and Practice

is required in the text by David Page, supplemented by readings in the later excellent works of Seely, Schaffer, Hanus, Butler, etc., and constant references to the current educational articles in the standard magazines and professional journals.

Frequent lectures are given on practical school room subjects by teachers whose experience has covered every phase of public school work.

THIRD YEAR CLASS

HISTORY OF EDUCATION.

The importance of a knowledge of the history of education was never so fully recognized as at the present time, and familiarity with it is an essential part of the equipment of every well informed teacher. The history of education portrays the theories and methods of the past, warns of error and indicates established truth, shows difficulties surmounted, and encourages the teacher by examples of heroism and consecration on the part of educators whose labors for their fellow men we discuss. To the teacher this study is a constant help in the school room, the trials of which are met with the added strength and inspiration gained from contact with great teachers of the past.

The text used is Seely's History of Education, with reference to Painter and Kemp, and constant reference to the library.

The "History of Education in West Virginia," issued by the Bureau of Education, is used in considering the local development of education.

ETHICS.

No subject is of more real importance in a course of study than is Ethics. It deals with the product arising from all other research and investigation—namely, action. What we do determines what we are. We would often do better and act more commendably if we realized the influence of our actions, both on our own character and the character of those around us. The truly good man is the one in whom the universe of duty habitually predominates. William DeWitt Hyde says: "If we do our duty repeatedly and perseveringly in any direction, we form the habit of doing it, learn to enjoy it, and acquire a preference for it." Another has said: "I thank God that it is as easy to form a good habit as a bad one, and just as hard to break it."

Some investigation and written work from each pupil is required in this course.

Department of English

The work as planned in this department provides instruction in the following subjects: Orthography and Composition, four years; Grammar, three terms; Higher Lessons in English, two terms; Ad-

vanced Grammar, one term; Rhetoric, one year; Literature, one year. We believe that the objects of teaching English are:

1. To enable the student to understand the thoughts of others, and to give expression to his own.

2. To cultivate a taste for reading by giving the pupil an acquaintance with good literature, and furnishing him with the means of extending this acquaintance.

With these objects in view, the study of literature and the training of the expression of thought necessarily demand a large share of the time and attention of this department.

ORTHOGRAPHY.

The subject of Orthography begins with the study and use of words, a careful training in the use of diacritical marks, a study of homonyms, rules for capitalization and spelling, synonyms discriminated, and a careful study of word analysis and word building.

Constant use is made of the dictionary in order to obtain the correct pronunciation and meaning of words, and the student is required to make a use of the words in sentences.

The text used in the early part of the course is Reed's Word Lessons.

ENGLISH COMPOSITION.

Composition work is continued throughout the Normal Course, the student being required to write at least one original composition every month.

In the first year, especial attention is paid to punctuation, capitalization, letter writing, paraphrasing, and reproduction.

In the second year, to description of known objects, journeys, real and imaginary, narratives of personal experience, biography and history.

In the third year, to exposition by means of formal and informal essays, criticisms of work read, comparison of style of different authors and development of themes suggested by literary study.

In the fourth year, argumentations showing deductive and inductive reasoning, debates on questions of public interest, characterization of noted characters in history and fiction and original orations upon selected subjects.

REQUIRED READINGS.

It has been our experience that students presenting themselves for training in the Normal Schools lack the use of books and readiness in grasping the thought of the author. To remedy these

defects the entire school has been organized into sections for reading, the work being graded from the more elementary reading in the first year to the highest literature in the fourth year.

Realizing that, in this work, the student needs the guidance, assistance and encouragement of the teacher, three periods per week are devoted to the study of the masterpieces of English literature.

This study of the meaning, method and style of the author gives the greatest possible assistance to the composition work.

RHETORIC.

The first object in the study of Rhetoric is to give the student the power to express his thought with correctness, strength, ease and grace. With this object in view, daily theme work is given throughout the first and second terms. During the third term two longer papers per week (essay, oration, argumentation or review) are required from each pupil.

The careful study of selections illustrating the best prose style—as Stevenson, Curtis, Macauley, Lamb, Hawthorne and Poe—is a part of this course. The object in this is to verify rhetoric rules and theories and to teach the pupils to criticise style.

Text—Quackenbos's Rhetoric.

LITERATURE.

The aim of this department is: To give a general knowledge of the development of both English and American Literature; to present a careful study of representative authors; to form discriminating literary taste and to awaken a love for the best things that have been written. In short, to give the knowledge that will serve as a foundation for the student's future work and to awaken the enthusiasm that will make for culture and be a life-long pleasure.

The Library is used daily in this work. The preparation of essays and reviews is an important part of the course.

Texts—Hawthorne and Lemon's American Literature, Halleck's History of English Literature and Syle's "From Milton to Tennyson."

REQUIRED READINGS.

Required reading upon which the students report in class embraces those classics which are specified in

"College Entrance Requirements in English."

These have been arranged to and including 1905, as follows:

FOR 1903-4-5.

For General Reading and Composition Work.

Carlyle's Essay on Burns.
Coleridge's Rime of the Ancient Mariner.
George Eliot's Silas Marner.
Goldsmith's Vicar of Wakefield.
Shakespeare's Julius Caesar.
Shakespeare's Merchant of Venice.
Sir Roger de Coverly Papers in the Spectator.
Tennyson's Princess.
Lowell's Vision of Sir Launfal.

For Careful Study.

Shakespeare's Macbeth.
Milton's L'Allegro, Il Penseroso, Comus, Lycidas.
Burke's Speech on Conciliation With America.
Macaulay's Essays on Milton and Addison.

Department of Science

The work pursued in this department embraces the following subjects: Physiology, one term; Zoology, one term; Botany, one term; Geology, one term; Physical Geography, one term; Physics, three terms; Chemistry, two terms, and Astronomy, one term.

PHYSIOLOGY.

Physiology is now the one science that is taught in all grades of schools. Normal students are instructed in the various methods by which it may be made interesting and personally helpful to the pupil of the public schools. It is taught as an informational rather than a disciplinary subject, with special reference to personal and public hygiene, so that the teacher may be trained to know that he

can do much for the happiness and welfare of humanity by skillful presentation of the laws of health.

To this end, instruction in hygiene is given with special reference to pure air, respiration, wholesome food, regular and sufficient sleep, regularity in bodily habits, care as to temperature, prudence concerning exposure, and total abstinence in narcotics.

Anatomical demonstrations are made from the bodies of domestic animals and from the Manikin Charts, and a set of Bock Steger Anatomical Models.

Text—Overton's Physiology.

PHYSICAL GEOGRAPHY.

The object of Physical Geography is to lead the student to understand the causes and activities of phenomena observed upon the earth's surface, and to awaken a special interest in nature and cultivate the habit of observation and thought concerning it.

In addition to this, the presentation of the subject is designed to awaken and develop a taste for the more abstract sciences of Physics, Geology, Zoology, Botany and Astronomy.

It relates, first, to the study of the earth in relation to the solar system and movements of the earth.

Second, to the study of the atmosphere, its position, weight, heat, moisture and the constant and variable winds and luminous phenomena.

Third, to the water, its depth, position, temperature, waves, tides, and currents, and their influence upon commerce, civilization and boundaries.

Fourth, to the land, its general division, surface structure, its springs, brooks, rivers, lakes, etc.; mountain structure and land sculpture, earthquakes and volcanoes.

Also a study of the earth with reference to contour and relief forms in relation to the inhabitants.

Fifth, to the climate in relation to the inhabitants and the influence which it exerts over the physical condition, civilization, occupation, and religious institutions of people.

Sixth, to the various forms of life and their distribution, ending with a discussion of the highest of all forms of animal life, man.

Davis' Physical Geography is used as a text, but reference is had to the following standard works: Houston, Maury, The Earth in Space, Appleton, Cornell, Guyot.

116723

ZOOLOGY.

In Zoology the aim is not to make Zoologists, but to encourage observation, and to cultivate an appreciation of nature. It is intended to show the adaptation of scientific methods to public school work.

The work of Zoology is devoted to a study of the nine branches of Animals. As far as possible it is made practical by the study of local fauna. Holder's Elements of Zoology is used as a text. The Library supplies all necessary reference books.

GEOLOGY.

The purpose of the course in Geology is to give a clear idea of the forces in operation producing structure; the structure, arrangement, and composition of rocks; and the history of the changes through which the earth has passed in the process of formation. To this end, the subject is treated under the following heads: Dynamical Geology, Structural Geology, and Historical Geology.

The subject matter of the text is illustrated by hand specimens and applied, whenever practicable, in field work.

Prerequisites: Physical Geography, Zoology, Botany.

Text: LeComte's Compend of Geology.

PHYSICS.

Three terms are offered in general physics, the subject being divided for the three terms as follows:

I. Matter, its properties and conditions; mechanics and acoustics.

II. Heat and radiant energy.

III. Electricity and magnetism.

Our method of instruction includes a due proportion of text-book study, lecture-room demonstrations, and individual work in the laboratory.

The laboratory is well provided with apparatus for illustrating the principles and performing the experiments.

A sufficient number of elementary quantitative experiments is required of each student to meet the requirement for credit in the university. After each experiment the student is to make a careful report in writing upon observation blanks especially pre-

LABORATORY

pared for the purpose. These reports, after review and criticism, by the teacher, are returned to the student, who is given full credit for the work thus done.

The text used is Avery's School Physics.

CHEMISTRY.

The work in chemistry consists of two terms of daily recitation. All necessary chemical material and apparatus are provided without additional fees for their use. Problems and exercises are given at intervals to prevent the student from becoming superficial and thouhtless in his work. The value of formulae and equations is shown in due time, and finally the atomic theory and other generalizations are dicussed and their value and significance explained.

BOTANY.

Botany is studied with a view of obtaining a knowledge of the form, structure, and habits of plants. The order of procedure in the development in organ tissue, cells and protoplasm.

A compound microscope is used in the examining of seeds, germination, stem, root, and leaf.

The value of field work is recognized by requiring a search for plants of the vicinity and the making of an herbarium of at least twenty-five plants with analysis. Every effort is made to stimulate independent investigation, and to have the note book and herbariums express truthfully and clearly what is seen.

ASTRONOMY.

The work in Astronomy embraces an outline of the celestial sphere and its circles, a description of the constellations, the problems of latitude and longitude, and descriptions of the earth, moon, and sun in relation to size, density, motions, etc.

Text—Young's Lessons in Astronomy.

Department of Mathematics

The course in this department comprises the following subjects: Mental Arithmetic, one term; Book-keeping, one term; Algebra, four tems; Geometry, three terms; Trigonometry, one term. In addition to these, a special course in Arithmetic for teachers is offered in the spring term.

ARITHMETIC.

The work in this branch includes explanations of arithmetical processes, definitions, and principles, and their application to practical work. The aim is to secure accuracy and rapidity, to deduce rules of operation by careful analysis, to show the unity of the subject, to develop the reasoning power of the student, and to enable him to impart successfully to others that which he has learned. In order to attain this end, elementary principles must be thoroughly understood, clearly expressed, and accurately applied.

ALGEBRA.

This subject continues throught four terms. In the first, special attention is given to the elementary operations and principles and their application to the solution of simple problems. The easier methods of factoring are here taught, but the chief aim of this term's work is familiarity with algebraic language and thoroughness in the four fundamental operations.

No student will be permitted to begin the study of Algebra who has not received credit for Arithmetic.

The second term is a review and an extension of the work of the first,—literal and fractional exponents, and special cases in multiplication and division receiving particular attention. All this is done with reference to factoring to which the greater part of the term is devoted. Factoring being the basis of all future work in Algebra, satisfactory progress is impossible without a thorough knowledge of this subject.

The third term includes the study of fractions, simultaneous simple equations, involution, and evolution.

The last term's work begins with the theory of exponents and embraces the subjects of radicals, radical equations, and quadratic equations.

Texts—Milne's Elements, and Milne's Academic.

GEOMETRY.

The work is begun by requiring the student to observe and construct the geometric forms and to learn the definitions, axioms, and postulates. A clear conception of these is essential to an understanding of the subject since they form the basis of the science. A clear conception of these is esential to an understanding of the subject since they form the basis of the science. One of the chief objects of the study of Geometry is to cultivate logical

exact thought, and clear, accurate expression. To secure this, the fundamental theorems in each book are used, their demonstrations being given—after which a large number of propositions are furnished the student for original demonstration. The application of the principles of Geometry to Mensuration is made a special feature of the last term.

Text—Milne's Plane and Solid Geometry.

TRIGONOMETRY.

The main features of the work in this subject are the following: The functions are defined as ratios and also represented by lines; sufficient analytical work for the development of all important formulas,—special emphasis being given to those essential to the solution of triangles.

Text—Wentworth's Plane Trigonometry.

Department of History

The work in this department comprises two terms in U. S. History, two terms in General History, one term in Grecian History, one term in Roman History, one term in English History, one term in Civics, and one term in Economics.

The work in these branches is carried on not only by the use of the text-book, but also by extensive use of the library, the idea being to implant in the student a fondness for history, from a philosophic rather than chronological standpoint, and to show him the close connection existing between history and literature. All facts are learned only as a means to an end, this end being the cultivation of sound judgment and the development of those powers in the pupil which will best serve him in after life. History is adapted as a culture study by giving such concepts of human life and action as will impress upon the thoughtful student the effects of environment and character building, first upon the individual, and through him, upon the race.

For the purpose mentioned and by way of comparison, especial attention is paid to the study of the history of Greece and Rome, England and America.

The school library is well supplied with historic literature, histories for comparative reference, novels and works upon historical subjects. In addition to text-book work the student is also given topics to develop from outside sources.

UNITED STATES HISTORY.

The plan recommended by the Committee of Ten, that an intensive study of some period of history be followed, has been adopted, and the topics recommended by the Committee will be used as far as practicable. The outline in this branch is intended to present the development and growth of America from its discovery, settlement, colonization, revolution, development of the Constitution, &c.

In connection with the history, biographical interest is awakened by short sketches from the lives of the great statesmen. The study of the institutional life of the country is considered of primary importance as it is the knowledge that will best serve the pupil in after life. To this end the student is encouraged to express his own ideas in connection with what he has gleaned from reading or any outside sources, and an endeavor is made to show him how the questions that present themselves to the people of this country are the direct effect of past causes, and how, in general, each cause has its corresponding effect.

The objects and methods of teaching are also discussed and exemplified. McMaster's History is used as a text.

McMaster—With the Fathers.
McMaster—History of the People.
Thwaite—The Colonies from 1492 to 1750.
Hart—Formation of the Union—1750 to 1829.
Wilson—Division and Reunion—1829 to 1889.
Fiske—Critical Period of American History.

GENERAL HISTORY.

Two terms are devoted to General History. Special attention is given to the development of government and civilization. Attention is given to the conditions existing in each country at the present time. Myer's General History is used as a text, and reference is given to the best works in the Library.

HISTORY OF GREECE.

The history of Greece is one of the most interesting, attractive, and culture-giving of all histories. An acquaintance with its historians, orators, and philosophers forms no small part of a liberal education. We study Grecian history primarily on the philosophic side, that we may learn the influence it has had on the world's history.

Text—Botsford's History of Greece.

THE ENGLISH ROOM

HISTORY OF ROME.

In Roman history, the character, manners, and customs of the people and the lessons that we learn from their successes and failures are impressed upon the student. Morey's Outlines of Roman History is used as a text.

ENGLISH HISTORY.

The history of England is of primary importance to the American people, since we obtain our laws, customs, and government of the Teutonic language, customs, and institutions; the Norman conquest, language, thought, and government; the Magna Charta obtained from King John and its effect on government; the Revival of Learning and the Reformation; Elizabeth's brilliant and successful reign, including the colonization of America, are topics that are fully discussed. Montgomery's English History is used.

MEDIAEVAL HISTORY.

The chief aim of mediaeval history is to show the marvelous development of the barbaric nations concerned in the overthrow of Rome into the advanced and cultured people of Modern Europe.

This course is optional.

MODERN HISTORY.

Modern history directs the student's attention to those things which the past has contributed to the present and enables him to appreciate and value the progress and emancipation of the marvelous nineteenth century.

This course is optional.

CIVICS.

This course embraces the origin, nature, theory, and necessity of government; the township, its origin and growth, as exhibited in the New England town, the Southern district, and the Western township; and its development into the county; the county into the colony, and the colony into the State; the origin of the Federal Union; the forms of governing the same under the Continental Congress, the Confederation, and the Constitution. Free use is made of the library, and subjects such as the following are investigated: "The Articles of Confederation," "The Ordinance of 1787," "Federalists and Anti-Federalists," "The Federal Executive," "Congress," etc. A great deal of stress is placed on the origin and de-

FAIRMONT STATE COLLEGE LIBRARY

velopment of the various parts of our government. Constant reference is made to Fiske's Civil Government, Bryce's American Commonwealth, Hinsdale's American Government, Fiske's Critical Period, Walker's Making of a Nation, Wilson's Theory of the State; McMaster's, Schouler's, and Bancroft's Histories of the United States, and other books of much interest along these lines. The lives of such leaders as Washington, Hamilton, Jefferson, and Madison present a source of much reliable information concerning the "critical period" studied in this course. Text, Willoughby's Civics.

ECONOMICS.

This course is intended to give the student a general knowledge of the more important elements in the existing form of industrial organization and the stages through which it has developed into its present complex system. The following are among the topics treated: The independence and responsibility of the individual as a member of society, freedom in choice of industry and exchange, production, distribution, exchange, transportation, consumption, money, and credit. The origin and significance of modern industrial organization is made clear by a historical study of the industrial systems of England and the United States. Special attention is given to questions involving the relation of the State to private enterprise embracing the subjects of private property, state regulation and control of industry, free trade, protection, taxation, &c. Problems of today, such as socialism, profit-sharing, co-operation, trades unions, monopolies, and trusts are investigated and studied.

From time to time students will be required to prepare written reports on assigned topics; for this reason the ability to write good idiomatic English is required of every student entering this course.

Text—Laughlin's Elements of Political Economy. References: Ely's Outlines of Economics, Problems of Today, &c., Walker's Political Economy, Smith's Wealth of Nations, Marshall's Economics, Gide's Political Economy.

Department of Ancient Language

LATIN.

Three years of Latin are offered, of which students in the Normal Course are required to taken the first two years (Terms 1-6).

It is the aim of this department to give such instruction in Latin as is required for entrance by the leading colleges and universities of the country. The courses offered are especially designed

to correspond to the work of the same grade done at the State University.

The work of the first year includes a thorough drill in the forms of inflection and the essentials of syntax combined with the acquirement of ease and correctness in the translation of easy prose into English and English into Latin as an adequate preparation for the work of the second year. Throughout the course emphasis is laid on the acquirement of a large vocabulary and the habit of deriving English words from the Latin, thus enabling the student to receive important practical benefits from the study of the language in addition to its value as a mental discipline. Attention is also paid to Roman and Greek Mythology and the influence it has had on our literature. The work of the three years is arranged as follows by terms:

FIRST YEAR.

Term 1. Smiley and Storke's "Beginner's Latin Book," lessons 1-30.

Term 2. Smiley and Storke's "Beginner's Latin Book, lessons 31-60.

Term 3. Smiley and Storke's "Beginner's Latin Book," completed. The work of this term will be supplemented by the reading of selections from the first book of Caesar, or easy prose selections from Collar and Daniall, and Dooge's "Second Year in Latin."

Note.—Terms 1, 2 and 3 above are the equivalent of courses 1, 2 and 3 at the University.

SECOND YEAR.

Term 4. Cæsar's Gallic War (Book I. and II. or an equivalent in the same text). Course 4 at the University.

Term 5. Cæsar's Gallic War (Books III. and IV. or an equivalent in the same text). Course 6 at the University.

Term 6. Cicero's First and Second Orations against Cataline. Course 7 at the University.

THIRD YEAR.

Term 7. Cicero's Third and Fourth Orations against Cataline; and the Oration for Archias. Course 9 at the University.

Term 8. Virgil's Anaeid (Books I., II. and III.). Supplemented by a study of Greek and Roman Mythology. Course 10 at the University.

Term 9. Virgil's Aenaeid (Books IV., V., and VI.). The study of Greek and Roman Mythology continued in connection with the text. Course 11 at the University.

Texts—The Revised Editions of Allen and Greenough's and Harkness's Grammars are used in Terms 4-9. Harper and Tolman's "Cæsar," Harper and Gallup's "Cicero's Orations," Harper and Miller's "Aenaeid," or other good texts are used. In terms 8 and 9 Guerber's Myths of Greece and Rome," and Gayley's "Classic Myths" will be used.

GREEK.

The work in Greek gives such preparation as is required for entrance to the leading colleges and universities, and the two years offered in this subject are arranged to correspond to the two years' preparatory Greek taught at the State University. A thorough drill is given in the inflections, the formation of words and the essentials of snytax during the first year. In the second year the aim is to inspire the student with the love of Greek literature and thought, to arouse an interest in Greek life, and to beget in him the ability to read and appreciate the language as a type of the best literature. The two years' work is arranged by terms as follows:

FIRST YEAR.

Term 1. White's "First Greek Book" (Chapters I-XL).

Term 2. White's "First Greek Book" (completed).

Term 3. Xenophon's Anabasis (Book 1). Prose Composition once a week.

Texts—Goodwin and White's "Xenophon's Anabasis," Goodwin's "Greek Grammar," and Pearson's "Greek Prose Composition."

Note—The above three terms are the same as Courses 1, 2, and 3 at the University.

SECOND YEAR.

Term 4. Xenophon's Anabasis (Books II., III., and IV.). Prose Composition once a week. Texts—Same as Term 3. Course 5 at the University.

Term 5. Lysias' Orations. Prose Composition once a week. Collateral reading in the library. Course 6 at the University.

Term 6. Homer's Iliad or Odyssey (Book I., II., and III:): Special attention to Greek Mythology. Seymour's "Iliad." Collateral reading: Jebb's "Introduction to Homer;" Gladstone's "Time and Place of Homer." Course 7 at the University.

THE MOZART LITERARY SOCIETY HALL

Department of Modern Languages

The Board of Regents has recently made German and French a regular part of the established curriculum. Two years' courses in each are offered.

The first year's work embraces principally drills in the accidence, simpler forms of syntax and conversation, together with an introduction to the less difficult gems in the literature, of the fundamental elements of their grammars, and of a good working vocabulary.

The second year will embrace a somewhat extensive course of instruction in their syntax, history and more especially their literatures. The instruction is by recitation in, and citations from, approved text books. Frequent exercises in translations of English into these languages are also required in both years' courses.

Students who expect to enter this department must have a thorough knowledge of the elements of English grammar, and should preferably have completed at least a year of Greek or Latin, although German is taken as a substitute for Greek, and French for Latin.

FRENCH.

1. Chardenal's Complete French Course and easy conversation throughout the year.

2. Course I. continued; Bocher's Otto's French Reader.

3. Course II. continued, Chardenal's Complete French Course and Bocher's Otto's Reader finished, Halevy's L'Abbe Constantin.

SECOND YEAR FRENCH.

4. Sand's La Mare au Diable, Merrimee's Colomba; easy composition.

5. Racine's Esther, Corneille's Le-Cid and prose composition.

6. Moliere's L'Avare; selections of prose and poetry from modern authors.

GERMAN.

Five recitations a week throughout the year.

FIRST YEAR GERMAN.

FALL TERM.....
- Elementary German Grammar.
- Stern's Studien und Plaudersien.

WINTER TERM...
- Thomas' Practical Grammar.
- Heyse's L'Arrabbiata.
- Von Hillern's Hoher als die Kirche.

SPRING TERM.....
- Thomas' Practical Grammar.
- Stern's Geschichten von Rhein.
- Sight Reading and easy letter writing.

SECOND YEAR GERMAN.

FALL TERM.....
- Harris' Prose Composition.
- Freytog's Die Journalisten.
- Supplementary Grammer Exercises.

WINTER TERM...
- Harris' Prose Composition.
- German Lyrics and Ballads.

SPRING TERM....
- Schiller's Wilhelm Tell.
- Schiller's Marie Stuart.
- Sight reading throughout second year.

Text Books Used

Below is given an exhibit of the character of the subject matter, list of text books used, and time in which they should be completed.

PREPARATORY DEPARTMENT.

Arithmetic, Practical, Milne's Standard: Three terms.
Book-keeping, Bryant and Stratton: One term.
Grammar, Harvey: Three terms.
Geography, Frey or Natural: Two terms.

NORMAL AND ACADEMIC DEPARTMENTS.

Algebra, Milne's Elements: One term.
Algebra, Milne's Academic: Three terms.
Arithmetic, Mental, Brooks: One term.
Astronomy, Young: One term.
Botany: One term. Text to be adopted.

Chemistry, Storer & Lindsay: Two terms.
Civics, Willoughby: One term.
Ethics: One term. Text to be adopted.
Economics, Laughlin: One term.
English, Higher, Reed & Kellogg. Two terms.
French, Whitney, etc.: Six terms.
Greek, White, etc.: Six terms.
Geography, Physical, Davis: One term.
Geology, Le Comte: One term.
Grammar, Patrick: One term.
German, Thomas, etc.: Six terms.
Geometry, Milne: Three terms.
History, Grecian, Botsford: One term.
History, Roman, Morey: One term.
History, English, Montgomery: One term.
History, General, Myers: One term.
History, Mediaeval: One term. Optional.
History of Education, Seeley. One term.
History, Modern. One term. Optional.
Literature English, Halleck: Two terms.
Literature, American, Hawthorne & Lemon: One term.
Latin, First Year, Smiley & Storke: One year.
Latin (Second year): One year.
Music, Nat. Music Course: One term.
Orthography, Reed and Irish: Four years.
Physics, Avery: Three terms.
Psychology, Halleck: One term.
Physiology, Overton: One term.
Pedagogy, Boyer: One term.
Rhetoric, Quackenbos: Three terms.
Theory and Practice, Page: One term.
Trigonometry: One term. Text to be adopted.
Zoology, Holder: One term.

Department of Music

MISS SARAH MAXWELL, Teacher.

Music, generally speaking, is too apt to be regarded as a mere empty accomplishment. Consequently the time devoted to it is limited, and the knowledge attained superficial.

Experience has taught us that with no very extraordinary gifts, provided there is sufficient general intelligence, every one can accomplish something in music. Many are endowed with natural

taste, correct ear, and poetical sentiment who may never have the opportunities necessary to make great artists. These are, however, capable of comprehending and interpreting good music. If only those who are capable of becoming great artists were taught music, we would lose one of the chief cources of recreation, and music unlike many other amusements, leaves no sting in its trail.

"To neglect the ear while we train the eye is to discriminate unfairly against one of the chief senses. To educate the child and not train him in music, is to give him a one-sided culture. He is not a complete man; he is defective; incapable of appreciating the marvelous and inexhaustible beauties of sound; unable to express his feelings in the most expressive way; shut out from sympathetic companionship of those more favored than himself, he has been robbed of his birthright."—From Morgan's "Studies in Pedagogy."

Superior advantages are offered to all who wish to study Piano, Organ, Voice Culture and Sight Singing. A course is offered which is designed for teachers in Public School work. It includes: Ear Training, Tone Production and Sight Singing. During the year opportunities will be given pupils to appear in public.

The tuition for private instruction, on Piano or Organ, is ten dollars per term of twenty lessons, payable half at the beginning and the balance at the middle of the term,an d no deduction is made for absence except in case of illness.

STUDENTS IN THE DEPARTMENT OF MUSIC.

VOCAL.

Ladies.	Gentlemen.
Bowers, Florence	Armentrout, O. E.

Department of Oratory, Elocution and Physical Culture

MABEL NORTON SIMMONS.

Graduate of Emerson College, Boston.

Graduates, 1904, Stella Mae Bosworth, Elkins, W. Va.

"The orator is educated by the quickening and developing of all the intellectual faculties, cultivating the imagination, deepening and guiding the feelings, disciplining all the agents of expression, making the will sovereign, and then leaving him free to express his thoughts, convictions and emotions in accordance with his own temperaments." The personal and literary culture afforded by this training is of the highest value to men and women in every walk of life. "When a man loves the truth and lives it, and can present it effectively to others, he has received the best possible preparation for the work of life as well as for the work of oratory."

The system of physical culture taught preserves and develops health and gives grace and beauty to the body, which produces greater vigor of mind.

Attention is also given to the strengthening and culture of the speaking voice. Stammering, lisping and other defects of speech may be overcome by the application of the principles taught.

The Art Department

AMABEL KELLEY.

A proper conception of the art of Drawing is absolutely essential to all persons in every walk of life. Without it no man or woman can intelligently comprehend the true character, nature or relation to each other, the countless objects, about us bear.

"A knowledge of it enables the students to discover what it is in things which makes them beautiful or ugly, sublime or ludicrous, and to make out the distinctions and trace the dependencies of nature and artistic beauty."

The system taught affords him a training in Eye Measurments, Perspective Drawing from Still Life, and Life.

Superior advantages are offered to those who wish to pursue the study.

General Information

LOCATION.

Fairmont is a growing city in Marion county, seventy-eight miles east of Wheeling, twenty-two miles from Grafton and thirty-three miles from Clarksburg, having the Baltimore & Ohio, the Fairmont, Morgantown & Pittsburg, and the Monongahela River Railroads passing throught it. It is situated on the banks of the Monongahela river, in the midst of a landscape of surpassing beauty and loveliness. Its population is intelligent and moral, and disposed to extend to students coming among them all the kindness and attention demanded by Christian courtesy and culture.

HISTORY.

The Fairmont State Normal School owes its existence to the beneficence of the citizens of Fairmont and vicinity, and to the Legislature of West Virginia. A bill proposing the establishment of a State Normal School at Fairmont was introduced in the Legislature of 1865-6, but the session adjourned without passing it. Meanwhile the citizens ot Fairmont formed a joint stock company under the title of "The Regency of the West Virginia Normal School," and secured a charter. A lot was purchased and the wing of the present public school building, 68 by 40 feet, and two stories high, was commenced in the summer of 1867, but before its completion the Normal School passed under the control of the State.

In February, 1867, the Legislature voted $5,000 to the Fairmont Normal School on condition that $2,000 additional be paid by the citizens of Marion county, the State agreeing to make the same a State Normal School, and to finish and furnish the same, and to open a school therein without delay; whereupon the incorporators, in consideration of $2,000, transferred all their interest to the State.

On February 11, 1872, the Legislature passed the following bill: "That the sum of $5,000 is hereby appropriated out of all the moneys in the treasury, to be expended under the direction of the Regents of the State Normal School at Fairmont, but no part of the sum hereby appropriated shall be drawn from the treasury unless and until the Board of Education of the district of Fairmont shall pay into the treasury of the State the sum of $5,000,

which shall be added to the sum hereby appropriated, the whole constituting a fund of $10,000 to be paid out of the treasury and expended as aforesaid."

By virtue of the last named act, the district of Fairmont claimed to have acquired an equitable interest in the said building, and the two schools occupied the building until 1891, when the growing needs of the Normal School demanded more room. It was decided to petition the Legislature to sell the present Public School building to the District of Fairmont for the sum of $12,000, and also to appropriate $20,000 additional for the erection of a new Normal building.

The bill was passed on the 9th day of March, 1891, and provided for the sale of the old building for $15,000, and appropriated $20,000 additional for the erection of a new Normal building.

In February, 1892, at the City of Charleston, the contract was let for the construction of the present Normal building, and on June 14th the corner-stone was laid by the Masons with imposing ceremonies. On March 27th, 1893, the school formally took possession of the new building, with an interesting program of exercises.

In February, 189,5 the Legislature appropriated the additional sum of $12,000 for the completion of the building, by adding the wing which had been contemplated in the original plans. This wing has been completed and furnished.

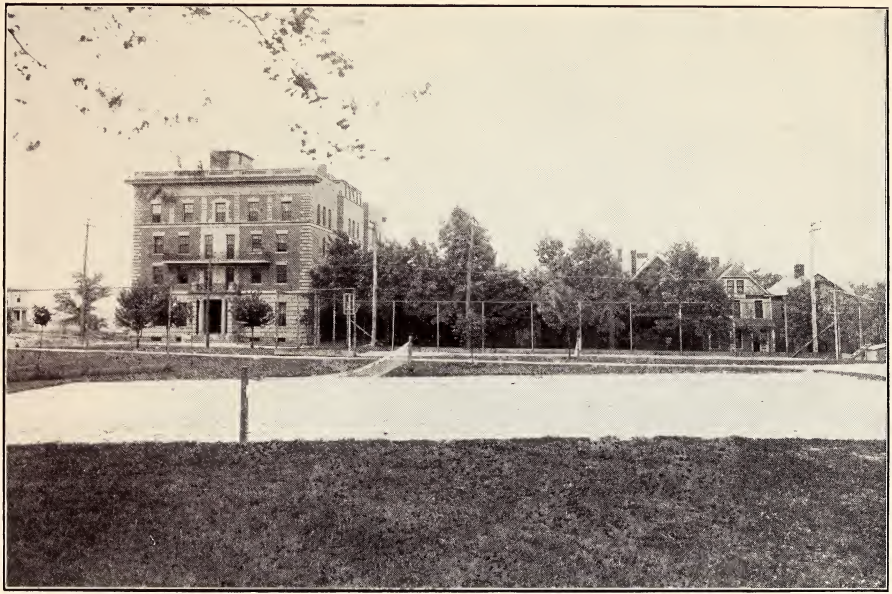
BUILDING AND GROUNDS.

The building is constructed of red brick with stone sills and lintels. It is well proportioned and presents a grand and imposing appearance. It has a frontage of 100 feet, with a depth of 150 feet.

The basement contains gymnasium rooms for ladies and gentlemen, janitor's room, storage rooms, and rooms for the heating apparatus. The first story contains six large class rooms, a small class room, an apparatus room, an office and two cloak rooms, and five flights of stairs to the second story and basement.

The second story contains a beautiful new chapel and study hall, nine large class rooms, two offices, library, cloak room and ladies' parlor. The third story conatins the large auditorium, one of the finest assembly halls in the State, capable of seating one thousand persons, and two splendid society halls. There are also two dressing rooms on this floor supplied with lavatories.

The building is finished throughout with West Virginia pine and presents a very pleasing effect. It is ventilated by the Bennett



ATHLETIC FIELD

& Peck system, and heated by a new steam plant. The outside steps and platform are Cleveland standstone with ornate buttresses and trimmings. The entrance to the building from Fairmont avenue is adorned with a handsome vestibule which contains an ornamental steel ceiling. A Howard clock with dials eight feet in diameter adorns the tower. This elegant edifice is placed upon a most beautiful location in what is known as the South Side of Fairmont. The grounds have been recently graded and terraced and a splendid stone wall runs the entire length of the grounds along Fairmont avenue, Second street, Gaston avenue and Third street.

This building is the most complete and commodious of any single school building in the State. A cut of the complete building may be seen on the second page of this catalogue.

PRINCIPALS.

Prof. W. R. White was the first principal of the school after it passed under the control of the State in 1868, and continued such until 1870, when he resigned. He was succeeded by Prof. J. C. Gilchrist, who was principal until 1871. Rev. J. G. Blair, LL. D., was then appointed principal, which position he occupied until his death, December 22, 1878. Miss M. L. Dickey succeeded Dr. Blair, as acting principal, continuing as such until 1881, when she resigned and was succeeded by Prof. Ulysses S. Fleming as acting principal until 1883, when the Regents chose as principal Conrad A. Sipe, A. M., who resigned August, 1889. The Regents then appointed Miss N. R. Cameron acting principal, who resigned in June, 1890, and John H. Roemer, A. M., was principal for 1890-91. J. C. Gwynn was chosen as principal in September, 1891, and continued as such until July, 1892, when the Regents chose as principal J. Walter Barnes, A. M. He was succeeded in July, 1901, by M. M. Ross, who continued as principal until his death, December 27, 1902. On the death of Prof. Ross, M. C. Lough, A. M., was made acting principal for the remainder of the year. On August 25, 1903, Principal W. L. McCowan of the West Liberty State Normal School, was chosen as Principal.

Suggestions.

Students will please remember:

1st. That they are ladies and gentlemen.

2d. That good order is indispensable to the best work.

3d. That there should be a definite time for study, for exercise, for meals, and for sleep.

4th. That there should be no talking or laughing in the class rooms, library or chapel.

5th. There should be no gathering in groups, or promenading on the streets, or absence from rooms during study hours.

6th. Students should retire not later than 10:30 P. M.

7th. That absence and tardiness should never occur except in case of illness.

8th. That politeness, generosity and industry are always appreciated.

9th. That regular attendance at Sunday School and Church services is a duty of the highest importance.

10th. That keeping company with the opposite sex is as a rule inconsistent with strong work in the school.

11th. That no student will be allowed to absent himself from recitations or examinations.

12th. Do not be too anxious to enter advanced classes. There will be no time to make up back studies.

13th. Come expecting to work faithfully and honestly, prepared to make any sacrifice for your own good, and for the good of the school.

14th. Bring with you as useful for study or reference all the text-books you have.

15th. Do not attempt to complete the prescribed course of study unless you have good bodily health and having this do not jeopardize it by practicing the false economy of living without sufficient or suitable food, or necessary comforts.

LYCEUM LITERARY SOCIETY HALL

PERSONAL COPY NOT FOR RESALE

Facilities for Work

"The true university is a collection of books."—Carlyle.

LIBRARY.

The Alumni library started about twenty years ago by the Alumni Association formed the nucleus of the present Normal Library. Books have been added during recent years, until now it contains three thousand four hundred and thirty-seven volumes (this does not include Government reports, of which there are over two thousand), and is especially complete in the departments of Pedagogy, History, Literature and Economics.

The use of the library is facilitated by a card catalogue containing the title of every book, and the name of its author. Great care has been taken in the selection of books, and the use of them made by the students shows that the collection has been well chosen. The number of reference books is unusually large.

On the second floor near the principal's office is a well lighted room, which is fitted up for a library and reading room. It is furnished with cases, reading tables and easy chairs. The library is open each evening from 2:00 to 4:00 P. M. Students are permitted to take books for home use, but no one shall have more than two books at the same time without special permission, nor retain any book more than two weeks without renewal.

PUBLIC DOCUMENTS.

Through the efforts of Hon. Wm. L. Wilson, this school was designated as a depository of public documents; accordingly all valuable and important works issued by the departments of the government are forwarded to the library. This will continue to be the depository, as it has been so designated by Hon. A. G. Dayton, Member of Congress from Second Congressional District.

CURRENT LITERATURE.

Leading articles in the magazines are reported on in the several composition classes, and the students are required to read

articles assigned by the teachers. In this way public questions are thoroughly discussed. Current topics in newspapers are also reported from week to week.

READING ROOM.

An excellent reading room is maintained for the school and many of the leading periodicals are furnished, among which are the following:

MONTHLY.

American School Board Journal.
*American Education.

LITERARY SOCIETIES.

Two literary societies, the Mozart and the Lyceum, are connected with the school. Both ladies and gentlemen become members of each society. Students are not compelled to join a literary society, but they are advised to do so. A literary society, properly conducted, supplies some features in education that are not likely to be supplied by any other agency. Although a rule adopted by the Regents gives the Faculty control of the literary societies, yet this control is largely delegated to the members, and they elect their officers, assign performances, punish their own members for neglect of duty, and conduct the affairs of the societies generally. the Faculty having such control and oversight as will prevent any individual from being wronged, the time wasted or the school injured by any improper conduct.

INTER-NORMAL CONTEST.

A. J. Wilkinson, Esq., a prominent graduate of the Fairmont Normal School, class of 1884, has offered to the Normal students an opportunity to compete in oratory by offering two prizes. First prize, $25 in gold; second prize, $10 in gold. In 1898 he offered a prize to the member of the senior class of any of the Normal Schools who would write the best application for a school. This prize was won by Miss Hallie Swan, of Tyler County, a graduate of the Fairmont Normal School.

On the evening of April 8, 1899, in the city of Parkersburg, the second Inter-Normal Oratorical contest was held, and the first prize was won by Mr. Tusca Morris, of the Fairmont Normal School. April 26, 1900, witnessed the third oratorical contest at Clarksburg. Shepherdstown Normal receiving first honors.

The fourth Inter-Normal contest was held in the City of Charleston, February 9, 1901, the representative of the Athens Normal school winning first place.

The fifth annual contest was held April 5, 1902, at Grafton, in which J. C. Bond, a student of this school, won first prize, giving Fairmont three first prizes in five contests.

The sixth annual contest was held at Martinsburg, April 11, 1903, the first prize being won by the representative of Marshall College Normal School, Miss Willa F. Hickman, of the Fairmont Normal taking the second prize.

At Hinton, April 16th, the 1904 contest was held. Marshall College was awarded first prize, and Shepherdstown College, second prize. Mr. E. B. Harden represented Fairmont Normal School.

GYMNASIUM AND ATHLETICS.

The Gymnasium is well supplied with apparatus consisting of striking bags, chest machines, dumb bells, Indian clubs, horizontal bar, parallel bars, etc. Out-door exercise and games are encouraged and a uniformed base ball team has been organized which has sustained itself creditably in several match games. Besides the first team other clubs have been formed, and this most popular of outdoor sports furnishes recreation for a large number of students.

A lawn tennis outfit, basket ball and croquet set, have been purchased for outdoor play for the young ladies, and suitable and popular indoor games provided for cold weather.

It is believed that such pleasureable recreation judiciously indulged in will prove of great value.

Much interest has been evinced in all these sports by the students and excellent results have followed.

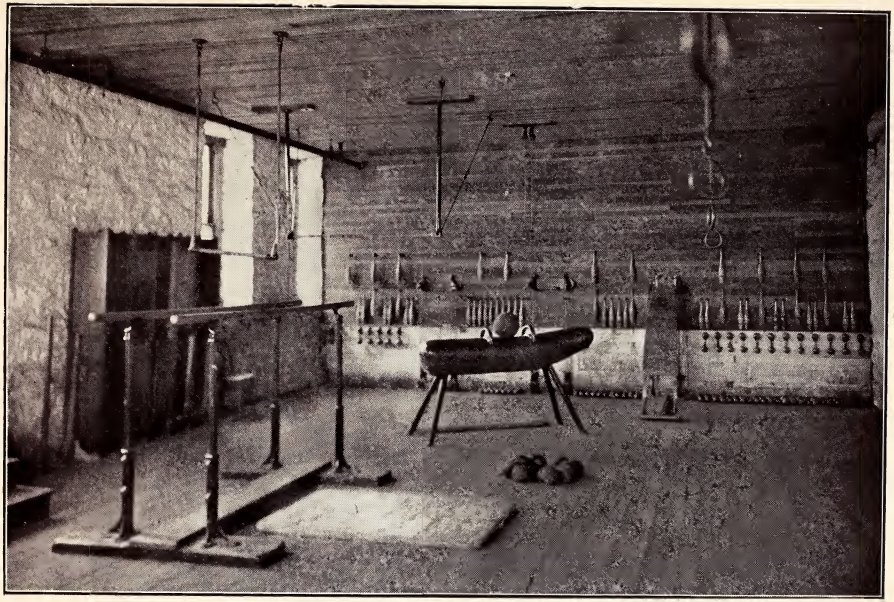
MORAL CULTURE.

This school is strictly a State institution, and as such is in every respect unsectarian. It esteems sound morality, obedience to truth and virtue, and a courteous regard for the opinions of others as matters of paramount value. Everything that would contaminate the moral character, incur reproach or weaken virtuous habits, is carefully guarded against. There are eleven churches in town, with regular Sabbath service, each having prosperous Sabbath Schools, and other Christian organizations. Students are cordially welcomed to these privileges. All students are required to be present at the chapel exercises of the School each day.

Abundant opportunity presents itself in the life of the School for the testing of the moral character and the exercising of those virtues which are indispensable to the teacher. The cultivation of such qualities as industry, self-denial, earnestness, and generosity is as important to the student as the development of the mental powers. The intercourse between students and teachers is characterized by sympathy and mutual helpfulness.

MORAL REQUISITES.

While as a State School this institution is wholly secular and its instruction has no reference to religious, sectarian or political dogmas, yet it is designed to inculcate the principles of good citizenship and honorable manhood. Each student is treated as a gentleman or lady and expected to exhibit a corresponding deportment.



GYMNASIUM

No pupil can continue in this school on other conditions. It is expected that all students properly observe the Sabbath and attend church on that day with some one of the congregations of the town. No immoral, profane or dissipated person can remain a member of the institution. Parents need have no fear in this respect in sending their children to this school.

GOVERNMENT.

The government of the school involves three elements:

1. It is wrong not to do right.
2. The culture of a high sense of personal honor.
3. The highest style of government is self-government.

Students who will not govern themselves cannot hope, as teachers, to govern others. Each pupil is put upon his honor.

The endeavor of the Faculty is to enforce strict discipline in all departments of the school. The aim being to secure this by an appeal to the honor of the student, but in case of failure to secure the desired end in this way, the Faculty will not hesitate to enforce prompt obedience to all rules and regulations. Those who do not conform cheerfully to all requirements will be permitted to withdraw, or be dismissed from the school.

SESSIONS OF SCHOOL.

There is one session a day, beginning at 7:30 A. M., and closing at 12:30 P. M. Study hours are two hours in the afternoon and from 7 to 10 in the evening. Students are required to be present at the chapel exercises each morning at 9 o'clock and to observe study hours as above.

EXAMINATIONS.

Pupils shall attend all required examinations of the year, and no pupil shall be permitted to advance who does not attain a standing of seventy-five per cent., including class standing and examination.

Normal pupils who fail to make a standing of seventy per cent. shall forfeit their State appointment at the end of the term.

These examinations shall be in writing, or partly written and partly oral, and shall be conducted by the instructor in charge, under the supervision of the Principal. The examinations are held at such times as the faculty may direct.

Pupils applying for Normal Diplomas shall complete their examinations two weeks before Commencement.

All students who pass examination on a branch and obtain a standing of seventy-five per cent., shall be entitled to a pass certificate which precludes the necessity of further examination on that branch.

STATE CERTIFICATE.

Any person who completes the Normal course of study and who is of good moral character, will receive a diploma, which shall entitle him upon application, without examination, to a State Certificate, good for six years, provided, he shall present satisfactory evidence to the State Board of Examiners that he has taught successfully three years in the State under a Number One Uniform Certificate, two of which said three years shall immediately precede the application for such certificate. When the holder of this State Certificate shall present to the Board satisfactory evidence that he has taught successfully four years under this certificate, he shall be entitled to receive without examination a certificate good for twelve years. These certificates are valid in any school in the State, and are equivalent to a Number One Uniform Certificate.

CONDITIONS OF GRADUATION.

Satisfactory examinations shall be passed on all the branches required by the Course of Study. A thesis upon some educational subject shall be required of each candidate for graduation. Also a Commencement Oration is required.

STANDARD OF THE SCHOOL.

It is the purpose of the Board of Regents and Faculty of the School to maintain a high degree of scholarship and professional training, so that those who complete the course shall be well prepared for the work of teaching.

POSITIONS FOR TEACHERS.

This school does not provide positions for its graduates or undergraduates, but it will aid them in securing places whenever it is possible. Trained teachers are always in demand. We have many inquiries for good teachers at excellent salaries, and during the past year a larger number of our students were engaged in teaching than ever before, and yet we had calls which ye were not able to supply.

NORMAL APPOINTEES.

The number of students which each county in the State shall be entitled to appoint to the State Normal Schools, free of charge for tuition, shall be as follows:

Barbour	90	Mingo	31
Berkeley	138	Monongalia	120
Boone	56	Morgan	48
Braxton	151	Monroe	83
Brooke	48	McDowell	56
Cabell	168	Nicholas	68
Calhoun	63	Ohio	300
Clay	33	Pendleton	63
Doddridge	90	Pleasants	56
Fayette	150	Pocahontas	53
Gilmer	71	Preston	143
Grant	48	Putnam	108
Greenbrier	135	Raleigh	70
Hampshire	80	Randolph	82
Hancock	52	Ritchie	123
Hardy	50	Roane	112
Harrison	150	Summers	93
Jackson	143	Taylor	90
Jefferson	112	Tucker	82
Kanawha	315	Tyler	90
Lewis	112	Upshur	93
Lincoln	82	Wayne	143
Logan	40	Webster	40
Marion	143	Wetzel	123
Marshall	143	Wirt	67
Mason	168	Wood	198
Mercer	120	Wyoming	40
Mineral	93		

ADMISSION.

Any white yerson of proper moral character having sufficient preparation may be admitted to the school at any time. The age of applicants must be—male, not less than fourteen, and females, not less than thirteen years. It is desirable that all students enrolling shall have previously completed the Common School Course of Study, but Arithmetic, Physiology and United States History may be taught whenever, in the opinion of the Principal, such may be necessary, as evidence of completion of the Common School Course, the diploma or a first or second grade county certificate will be taken or the student can pass entrance examination.

Upon entering school, the student will be placed in such class or classes as his attainments and abiilty warrant. Students desiring to enter the third or fourth year classes will be permitted to

do so, provided they can pass a satisfactory examination in all the branches belonging to the preceding year.

Applications for appointments to the State Normal Schools should be made to the Superintendent of Free Schools of the county in which the applicant resides, or to the principal of the school which the student desires to attend. You can secure the appointment after you come to school.

Every certificate of appointment to the Normal Schools of this State shall be directed to the School which the applicant may desire to attend. The County Superintendent making such appointment shall at once notify the principal of said School of such appointment. The Faculty of said School shall, subject to appeal to

The Board of Regents, have power to annul any appointment or certificate for non-attendance, inaptitude to learn, immorality, or other good cause. In case of a certificate being thus annulled, the faculty shall notify the County Superintendent, who issued the certificate, of such nullification; whereupon if no appeal is taken to the state Superintendent within twenty days after the action of the faculty, he may make an appointment to fill the vacancy thus created. Every County Superintendent shall keep a record in his office of all appointments made by him.

Each appointee shall deliver the certificate of appointment to the Principal of the Normal School to which it is directed, and the Principal shall thereupon file it with the records of the school, and enter the name of such person on the register of Normal pupils.

FREE TUITION.

Tuition is free to all students holding appointments.

OTHER EXPENSES.

An incidental fee of $1.60 per term is charged. This fee is due at the time of enrollment and must be paid on entering.

A method called "Rooming" is very popular here both with the students and with the families who take boarders. It is this: The student pays so much for the furnished room and for the cooking, he supplying his own provisions. Whatever he provides is cooked, and his room is taken care of by the family as it would be were he boarding. By this method the cost is reckoned at about $2.25 to $2.75 per week, and the only inconvenience is the matter of providing.

Students who desire to board in clubs can reduce expenses to $2.25 per week by practicing economy. Board can be obtained at

Y. W. C. A. AND YOUNG MEN'S BIBLE CLASS

rates ranging from $3.00 to $3.50 per week, including room, fuel and lights. Two persons are expected to occupy one room. Those desiring to room alone can usually do so by paying a higher price.

Arrangements for board can be made better after arrival than by correspondence.

VISITORS.

Visitors are made welcome at all times. Teachers and educators are especially invited.

We are also pleased to see patrons of the school, and are glad to have visitors at our Chapel Exercises, which commence at 9 A. M. The School belongs to the State. Show your interest in it by paying it an occasional visit.

RELIGIOUS ORGANIZATIONS.

A Young Men's Bible Class has been organized recently under the supervision of the International Committee of the Student's Y. M. C. A. The class seeks to cultivate the habit of daily systematic study of the Bible. Membership is entirely voluntary. All young men of the institution are cordially welcomed.

The regular sessions of the Y. W. C. A. are held in the Music Room every Friday evening at 7:15 o'clock. Topics concerning student life are discussed in a manner beneficial to all. This organizations wields a great influence for good in this school.

DIRECTIONS.

Those who contemplate attending a Normal School would do well to write us. Do not hesitate to ask questions concerning the school; we like to answer them. When you have decided to attend our school, let us know upon what train you will arrive, and we will meet you at the depot. If you do not know in time to write, and arrive in town between the hours of 7 A. M. and 5 P. M., come to the school building.

ADVANTAGES SUMMARIZED.

We herewith present a few reasons why the youth of West Virginia, of both sexes, who desire an education that will fit them for business, college or teaching, should attend the Fairmont State Normal School.

1. It is easily accessible.

2. The healthfulness of the place and the sociability of the people are proverbial.

3. The Normal building, is large, commodious, in thorough repair, provided with modern furniture, large blackboard surface,

maps, library, lexicons, encyclopedias, physical and chemical apparatus, and musical instruments.

4. The Faculty is composed of graduates from the best schools in the country, who have added to their scholarly qualifications a varied and successful experience in teaching in both common and higher grade schools.

5. Thorough instruction in Instrumental Music and Voice Culture is given by one of the best teachers in the State.

6. In the Department of Elocution and Oratory thorough and systematic work is done by a specialist.

7. The school has an ESTABLISHED REPUTATION, and points with pride to the more than five hundred graduates, and to the more than three thousand teachers who attended one or more terms since its organization but did not graduate, who have been and are engaged in the profession of teaching, besides the many who fill positions of trust and profit in political, business and professional life, to show the place it occupies in the public esteem. THE DEMAND ANNUALLY MADE UPON THE SCHOOL FOR TEACHERS IS GREATER THAN THE SUPPLY.

8. Tuition for pay pupils is lower than at any school of like grade in the country, being only $6.00 per term of thirteen weeks. State pupils, on appointment, go free.

9. Boarding is only from $2.25 to 3.50 per week. The necessary expenses need not exceed $40.00 per term of 13 weeks.

10. The Academic course in instruction includes those branches embraced in the preparatory schools of our best colleges and universities among which are higher mathematics and ancient languages, and those who complete this course will be admitted to the University classes without further examination.

11. A special feature is the literary work by the students. The entire school is graded into classes, each one of which is under the direct personal care of one of the teachers. Opportunities for this work are also offered by the Literary Societies.

12. Particular attention is paid to the development of the social qualities of the students. The intermingling of the sexes in school and society work, where each one is held accountable to the law of personal honor and integrity, has been found to be productive of the most gratifying results. By these means the exercise of discipline has been reduced to the minimum, and the rule of self-government made supreme.

During the past year receptions have been held for the social benefit of the students. Upon these occasions the Faculty has been the receiving party, and they have been found to unite teachers and students much closer, as well as to render the students more intimately acquainted with one another.

The Alumni

This Association now numbers over five hundred members, over three-fourths of whom are engaged in school work in this and other states. No other influence has been so potent for good to the Fairmont State Normal School as that of her large body of successful and influential graduates. Through them has she been judged, is being judged, and is proud to be judged. Their loyalty is proverbial, their assistance vital, and their visits to the Normal always delightful to faculty and students.

CLASS OF 1872.

ANNA BELLE AYRES (Mrs. Owen S. McKinney), Palatine, Marion County. Present address, Fairmont. Taught three years.

LUCIA M. FLEMING (Mrs. F. E. Stewart), Fairmont, Marion County. Present address, Liberty, Nebraska. Taught nine years in the Fairmont Normal School.

MAMIE WATSON (Mrs. M. N. Barns), Fairmont, Marion County. Taught three years.

HYRE D. CLARK, Buckhannon, Upshur County. Present address, Huntington, West Virginia. Minister First M. E. Church.

Ladies, 3. Gentlemen, 1. Total number, 4.

CLASS OF 1873.

EXECUTIVE COMMITTEE.

DR. J. H. BROWNFIELD, Chairman.
JOSEPH E. SANDS, Esq., Secretary and Treasurer.
W. SCOTT MEREDITH, Esq.

JANITOR,

JAMES MESSENGER GANTZ.

Faculty

W. L. McCOWAN, Principal.

E. E. MERCER, First Assistant,
Mathematics.

ISABEL DAVENPORT,
Superintendent of the Training Department.

IDA ABBOTT,
History.

WILLA HART BUTCHER,
Latin and Greek.

WILLIAM R. SHAW,
Science, Gymnasium Director.

MABEL MODERWELL,
German,

MOLLIE VIRGINIA SMITH,
English.

ANNA E. WERTZ,
French.

MRS. LULU BILLINGSLEA,
Music.

DORA M. ROWE,
Elocution, Physical Culture.

AMABEL KELLY,
Art.

JESSIE ICE,
Librarian.

The following student teachers assisted during the spring term without pay:

ELMER H. FLINN,
Penmanship.

E. F. VANGILDER,
Arithmetic I.

S. D. HAYS,
Higher English I.

Appropriations

APPROPRIATIONS FOR THE FAIRMONT STATE NORMAL SCHOOL FOR THE YEAR CLOSING SEPTEMBER 30TH, 1905.

(House Bill No. 1.)

For furniture, three hundred dollars.
For library and apparatus, five hundred dollars.
For repairs, five hundred dollars.
For contingent expenses, five hundred dollars.
For janitor, seven hundred dollars.
For fuel, water and lights, eight hundred dollars.
For gymnasium, two hundred dollars.
For piano, two hundred dollars.
For walks and walls, two hundred and fifty dollars.
For physical apparatus, two hundred dollars.

APPROPRIATIONS FOR THE FAIRMONT STATE NORMAL SCHOOL FOR THE YEAR ENDING SEPTEMBER 30TH, 1906.

(House Bill No. 1.)

For furniture, two hundred dollars.
For library and apparatus, five hundred dollars.
For repairs, five hundred dollars.
For contingent expenses, five hundred dollars.
For janitor, seven hundred dollars.
For fuel, water and lights, eight hundred dollars.
For gymnasium, two hundred dollars.
For piano, two hundred dollars.
For walks and walls, two hundred and fifty dollars.
For physical apparatus, two hundred dollars.

For dormitory, including plumbing and lighting and heating apparatus and furnishing, seventeen thousand five hundred dollars. The plans and specifications of the work to be approved by the Board of Public Works, and also the contract for erecting the same, when let.

Enrollment of Students for 1904-05

OFFICE.

The Fairmont Normal

When the free school system of the State was established with the adoption of its first constitution, the standard of education was low. The people had not fully emerged from the pioneer stage, and but a small part of the State's territory was then developed. It was necessary to secure her teachers from the adjoining States, Ohio and Pennsylvania. The need of teachers was so urgent that the educational leaders, foremost among whom was Prof. Wm. R. White, the first State Superintendent, and the first principal of this school, made early, strong and repeated effort to secure the establishment of training-schools to supply this demand. They finally succeeded and the present system of Normal Schools was established, "For the instruction and practice of teachers of common schools in the science and art of teaching."

The anticipations of the founders have been fully realized, the influence of the Normal Schools has been greater than any other in bringing about the great educational uplift of the State. And the influence of this school has been marked in this worthy cause.

Since the establishment of these schools there has been, and is still, a lack of high schools, and it has been necessary for them to do high school and academic work, as well as professional. This condition still exists. The work must still be done. But it is a condition common to all Normal Schools; and a comparison of our Course of Study with those of the best Normal Schools in the United States, will convince the most skeptical of our friends that our Normal Schools are worthy of the name.

It is true that much of the modern technique of training work was not demanded in the earlier years of their existence, but there was that in our Normal especially, which was far better, the soul to soul contact with great leaders, and the inspiration and longing for higher ideals born in the rugged mountain farm boy, because of this contact with those whose sympathies were broad, whose lives were noble and whose methods were worthy of imitation. A modicum of this still lingers in the "Old Normal Halls, we trust, an inspiration and incentive to the present generation and to generations yet to come.

But, after all, a tree must be judged by its fruits, and not by the environment for which it is not responsible. We challenge this judgment, and with the worthy matron of old, point not boast-

*Optional.

LIBRARY.

Diplomas

Upon those who have completed the full Normal or Academic Course with an average standing of 80 per cent., and not below 75 per cent., on any one branch, and have been in actual attendance during the entire fourth or fifth year, the Board of Regents will confer a diploma of graduation in the Normal or Academic department, respectively. But before any certificate or diploma is granted the Principal of the School will be required to certify that those whom he recommends for graduation have fulfilled all the conditions and done all the work required for graduation.

"The entire fourth or fifth year" shall mean in this connection one full year of three terms.

Those who graduate in the Academic Course will be admitted to the Freshman Class of the State University without examination.

Those who complete both the Normal and Academic Courses usually have no difficulty in securing advanced standing at the University.

Special Classes in Spring Term

Many teachers of experience desire to spend one term in reviewing certain subjects which they are required to teach, or in pursuing certain professional studies, and yet are precluded from taking an extended course of study in any institution. Some of these are the leading teachers in their respective counties. They are prevented from pursuing a systematic course of study by being under the necessity of teaching during the fall and winter. For the benefit of these, special classes will be organized, if necessary, in U. S. History, Physiology, Theory and Practice, Civil Government, Bookkeeping, Arithmetic, Penmanship, General History. etc.

Explanation of Course of Study

The following is a classification of the branches of study pursued in this school:

PROFESSIONAL.

Psychology, Pedagogy, History of Education, Ethics, School Management, Lectures and Methods of Instruction, and practice work in teaching during the Senior year. Such review of the common school branches as may be necessary will also be required.

ENGLISH.

Orthography, Composition, Grammar, Higher Lessons in English, Rhetoric, and English and American Literature.

ANCIENT AND MODERN LANGUAGES.

Latin, Greek, German and French.

SCIENCE.

Physical Geography, Physiology, Zoology, Botany, Astronomy, Geology, Physics and Chemistry.

MATHEMATICS.

Arithmetic, Bookkeeping, Algebra, Geometry and Trigonometry.

HISTORY.

United States, English, General, Grecian, Roman, Mediaeval and Modern, Civics and Economics.

ART.

Penmanship, Drawing, Music, and Oratory.

Department in Education

This department furnishes the strictly professional training of the school. The work falls naturally under two main heads: (1) Theory in Teaching, and (2) Practice in Teaching. Theory in teaching is furnished by the courses in Psychology, History, and Principles of Education, School Management and Methodology. Practice in teaching is furnished during the Senior year. Observtion of the work of experienced teachers is intermediate to instruction in theory and practice in teaching.

COURES IN EDUCATION.

THEORY AND OBSERVATION.

This is the introductory course of the professional work. It purposes: (1) To investigate the meaning and scope of education to the end that the prospective teacher may gain a clear conception of the work which he is to do, and of his duties and responsibilities in that work; (2) to teach students how to study, and how to teach children to study; (3) to discuss the most general and fundamental educational principles as furnishing a basis for observation work; (4) to train students in the art of observation, in order that they may profit by the work of others.

Books used in this course: Text, Page—"Theory and Practice of Teaching." Reference, White—"School Management"; Fitch—"Lectures on Teaching"; Henderson—"Education and the Larger Life"; Spalding—"Things of the Mind," "Thoughts and Theories," "Means and Ends of Education"; Dewey—"School and Society," "My Pedagogical Creed"; Kingsley—"Health and Education.

PSYCHOLOGY.

Psychology furnishes the basis of method. Emphasis is laid upon it as the science that describes and endeavors to explain the ordinary mental activities of every day life. Only as such does it prove usable to the young teacher, and as such it aids perhaps more than any other subject of the curriculum in transforming the rudimentary receptive attitude of the student towards knowledge

imparted in schools, into intelligent dealing with facts as data for thoughtful investigation. This transformation is the great function of the Normal School, and marks the essential difference between the mere learner and the man of power.

Texts.—Halleck's "Psychology and Psychic Culture." James' "Briefer Course."

HISTORY AND PRINCIPLES OF EDUCATION.

The value of a carefully arranged course in the history of education in shaping the ideals and in giving balance to the judgment of the teacher can scarcely be overrated. The scope of this course is the investigation in regard to certain selected nations of: (1) Their aim in education as determined by their social conditions, and the effect of this aim as in turn determining those conditions; (2) the means employed for attaining this aim—their educational institutions, the subjects of the curriculum, and the methods used; (3) the results obtained; (4) the life and works of the leading educators of these nations. From such a study of what has been aimed at and accomplished by various peoples in the field of education the student should gain a clear conception of what education can reasonably aim to accomplish. He should gain, too, such a knowledge of methods and results as to enable him to judge wisely in whatever conditions and environments he may be placed as a teacher. We believe that the principles of education, their meaning and implications, can be best understood in the light of the conditions under which they arose; hence we unite the study of the principles of education with that of the history to form one course.

Books: Text, Seeley. A large number of reference books is used in this course.

SCHOOL MANAGEMENT.

This course is especially adapted to meet the needs of district school teachers. It takes up the problem of the graded system for rural schools, and endeavors to simplify the difficulties involved in adapting the state uniform course of instruction to the conditions which are peculiar to district schools. Other subjects discussed in this course are: Care of the school—seats, blackboards, ventilation and heat; organization and classification of the school; district school discipline; busy or seat work; calisthenics and games adapted to district schools; district school clubs and the

district school as a social center; nature study and observation work suitable to district schools.

Books:—"The Grading Course of Primary Instruction" for the State of West Virginia; Shaw—"School Hygiene"; Morrison—"Ventilation of the School." List of books given in connection with the course in Theory and Observation.

METHODS IN TEACHING.

There are three courses in this phase of the professional work. They are given in the course of study as "Reading and Reading Methods," "Method of the Recitation," and "General Methods."

Reading and Reading Methods: During the first half of the term reading is taught with special reference to thought interpretation. Other distinct aims of the work are: (1) To increase the student's knowledge of good stories to read and tell to the children; and (2) to teach the phonetic values of the letters of the alphabet. The second half of the term is given over to methods in primary reading. Instruction is given in the sentence, word and phonetic methods of teaching reading. Ways of combining these three methods and means of adapting them to varying school conditions are discussed. Practice in the making of perception cards and other teaching aids is a required part of the work of every student.

Books: Arnold—"Reading—How to Teach It"; "Reading—How It is Taught in Ten Cities"; various series of readers, such as "Stepping Stones to Literature," "Graded Classics," "Hawthorne Readers," Cyr's "Readers by Grades," and Jones' "Readers."

Methods of the Recitation: This course deals with the principles that underly the conduct of the recitation and with the preparation of lesson plans. Drill is given in the making of plans based upon the "five formal steps." Lessons illustrating the practical application of the inductive method to the different common school subjects are given before the class by the teacher. Every member of the class is required to make out and present before the class similar lessons in arithmetic, grammar and geography.

Books: Text, McMurry—"Methods of the Recitation." Reference, De Garmo—"Essential and Method," "Herbart and the Herbartians."

General Methods: This course continues throughout the senior year and includes (1) grammar and methods in grammar, (2) geography and methods, (3) number methods, and (4) nature study and methods. The subjects are treated in the order in which they are given. The subject is first taken up from the standpoint of review with the aim of giving a grasp of the subject as a whole—

its contents and limits. This is followed by the examination and application of the special principles which underly the study and teaching of the subject. The general principles thus far investigated derive their meaning from the nature of the child and are applicable to all branches of study. There are also special principles which are determined by the nature of the subject itself. Upon the understanding of and skill in applying these principles will depend largely the teacher's ability to make the subject of real educative value to his pupils.

PRACTICE IN TEACHING.

Every senior student is required to do at least one term of teaching. This may consist of assistant work to a regular teacher in the city schools, or of teaching in the Normal School under the supervision of the Superintendent of the Training Department.

Department of English

The work as planned in this department provides instruction in the following subjects: Orthography and Composition, four years; Grammar, three terms; Higher Lessons in English, two terms; Advanced Grammar, one term; Rhetoric, one year; Literature, one year. We believe that the objects of teaching English are:

1. To enable the student to understand the thoughts of others, and to give expression to his own.

2. To cultivate a taste for reading by giving the pupil an acquaintance with good literature, and furnishing him with the means of extending this acquaintance.

With these objects in view, the study of literature and the training of the expression of thought necessarily demand a large share of the time and attention of this department.

ORTHOGRAPHY.

The subject of Orthography begins with the study and use of words, a careful training in the use of diacritical marks, a study of homonyms, rules for capitalization and spelling, synonyms discriminated, and a careful study of word analysis and word building.

Constant use is made of the dictionary in order to obtain the correct pronunciation and meaning of words, and the student is required to make a use of the words in sentences.

The text used in the early part of the course is Reed's Word Lessons.

ENGLISH LANGUAGE.

I. Rhetoric and Composition.

1. A discussion of the principles which underlie the most notable theories of rhetoric and composition; an application of these principles to problems in the teaching of English.

2. Studies in prose style: A critical analysis of prose masterpieces to illustrate and verify the principles of rhetoric.

Authors studied: De Quincy, Arnold, Hawthorne, Macaulay, Morley and Greene.

3. A study of the paragraph. An inductive study from an analysis of specimens of prose. Frequent exercises in paragraph-

writing. Argumentations, showing deductive and inductive reasoning, debates on questions of public interest, characterization of noted characters in history and fiction, and original orations upon selected subjects.

II. Essentials of English Grammar and methods of teaching it:

1. A practical systematic course of English Grammar for teachers in grammar and district schools.

2. Emphasis on the language as now written and spoken; the evolution of English Grammar as a science and methods of teaching it.

ENGLISH AND AMERICAN LITERATURE.

I. Pre-Shakespearean drama; Shakespeare's early contemporaries, Green and Marlowe. Special study of the most characteristic dramas of Marlowe. Careful study with regrad to his influence on blank verse, dramatic unity, and delineation of character.

II. Shakespeare: Special attention to dramatic structure and character portrayal.

As You Like It, Macbeth, Hamlet, Julius Caesar, and the Merchant of Venice studied in class, other plays assigned for parallel reading.

Books required: Dowden's "Shakespeare; His Mind and His Art," "Shakespeare's Heroines" by Anna Jameson, "Short Studies of Shakespeare's Plots" by Ransome, Shakespeare's "Life and Character," by Hudson.

III. Spenser: Selections from Faerie Queen.

Milton: Two books from Paradise Lost and Lycidas.

Dryden: Palemon and Arcite, Essays of Lowell and Macaulay on Dryden and Bunyan.

Pope: Sleceted poems.

Johnson: Vanity of Human Wishes.

Goldsmith: Deserted Village.

Burns: Tam O'Shanter, Cotter's Saturday Night.

Scott: Lady of the Lake.

Wordsworth: Intimations on Immortality.

Byron: Selected poems.

Lamb: Selected essays.

George Eliot: Silas Marner.

Tennyson: In Memoriam, The Princess.

IV. American Literature. New England group of writers: Hawthorne, Emerson, Longfellow, Whitttier, Holmes and Lowell.

Interpretation study of some of the principal works of these writers and their place in English literature.

105632

V. Southern Literature: The development of southern literature in relation to southern conditions; a detailed study of important authors; the earlier chroniclers, political orators, humorists, novelists and poets.

Southern conditions; a detailed study of important authors; the earlier chroniclers, political orators, humorists, novelists and poets.

REQUIRED READINGS.

Required reading upon which the students report in class embraces those classics which are specified in

COLLEGE ENTRANCE REQUIREMENTS IN ENGLISH.

(*) The year the book is to be used.

A Group of Juniors.

Department of Science

The work pursued in this department embraces the following subjects: Physiology, one term; Zoology, one term; Botany, one term; Geology, one term; Physical Geography, one term; Physics, three terms; Chemistry, two terms, and Astronomy, one term.

PHYSIOLOGY.

Physiology is now the one science that is taught in all grades of schools. Normal students are instructed in the various methods by which it may be made interesting and personally helpful to the pupil of the public schools. It is taught as an informational rather than a disciplinary subject, with special reference to personal and public hygiene, so that the teacher may be trained to know that he can do much for the happiness and welfare of humanity by skillful presentation of the laws of health.

To this end, instruction in hygiene is given with special reference to pure air, respiration, wholesome food, regular and sufficient sleep, regularity in bodily habits, care as to temperature, prudence concerning exposure, and total abstinence in narcotics.

Anatomical demonstrations are made from the bodies of domestic animals and from the Manikin Charts, and a set of Bock Steger Anatomical Models.

Text—Overton's Physiology.

GEOLOGY.

The purpose of the course in Geology is to give a clear idea of the forces in operation producing structure; the structure, arrangement, and composition of rocks; and the history of the changes through which the earth has passed in the process of formation. To this end, the subject is treated under the following heads: Dynamical Geology, Structural Geology, and Historical Geology.

The subject matter of the text is illustrated by hand specimens and applied, whenever practicable, in field work.

Prerequisites: Physical Geography, Zoology, Botany.

Text: LeConte's Compend of Geology.

PHYSICAL GEOGRAPHY.

The object of Physical Geography is to lead the student to understand the causes and activities of phenomena observed upon the earth's surface, and to awaken a special interest in nature and cultivate the habit of observation and thought concerning it.

Davis' Physical Geography is used as a text, but reference is had to the following standard works: Houston, Maury, The Earth in Space, Appleton, Cornell, Guyot.

ZOOLOGY.

In Zoology the aim is not to make Zoologists, but to encourage observation, and to cultivate an appreciation of nature. It is intended to show the adaptation of scientific methods to public school work.

The work of Zoology is devoted to a study of the nine branches of Animals. As far as possible it is made practical by the study of local fauna. Holder's Elements of Zoology is used as a text. The Library supplies all necessary reference books.

PHYSICS.

Three terms are offered in general physics, the subject being divided for the three terms as follows:

I. Matter, its properties and conditions; mechanics and acoustics.

II. Heat and radiant energy.

III. Electricity and magnetism.

Our methods of instruction include a due proportion of text-book study, lecture-room demonstrations, and individual work in the laboratory, which is well provided with apparatus for illustrating the principles and performing the experiments.

A sufficient number of elementary experiments is required of each student to meet the requirements for credit in the university. After each experiment for credit the student is to make a careful report in writing upon observation blanks especially prepared for the purpose. These reports, after review and criticism, by the teacher, are returned to the student, who is given full credit for the work thus done.

The text used is Avery's School Physics.

CHEMISTRY.

The work in Chemistry consists of two terms of daily recitations in addition to experiments and demonstrations by the instructor. When the students have gained a general knowledge of the elements and their combinations and have learned the meanings of formulas and equations, problems and exercises are given.

After the first few weeks each member of the class is required to report at least one afternoon each week for individual experimental work. All necessary chemicals and apparatus are provided without additional fees for their use. The latter part of the second term is given to the study of the compounds of carbon, in which the text-book is supplemented by works on Organic Chemistry.

Text: Storer and Lindsay's Elementary Manual of Chemistry.

BOTANY.

Botany is studied with a view of obtaining a knowledge of the form, structure, and habits of plants. The order of procedure in the development in organ tissue, cells and protoplasm.

A compound microscope is used in the examining of seeds, germination, stem, root, and leaf.

The value of field work is recognized by requiring a search for plants of the vicinity and the making of an herbarium of at least twenty-five plants with analysis. Every effort is made to stimulate independent investigation, and to have the note book and herbariums express truthfully and clearly what is seen.

ASTRONOMY.

The work in Astronomy embraces an outline of the celestial sphere and its circles, a description of the constellations, the problems of latitude and longitude, and descriptions of the earth, moon, and sun in relation to size, density, motions, etc.

Text—Young's Lessons in Astronomy.

Department of Mathematics

The course in this department comprises the following subjects: Mental Arithmetic, one term; Book-keeping, one term; Algebra, four terms; Geometry, three terms; Trigonometry, one term. In addition to these, a special course in Arithmetic for teachers is offered in the spring term.

ARITHMETIC.

The work in this branch includes explanations of arithmetical processes, definitions, and principles, and their application to practical work. The aim is to secure accuracy and rapidity, to deduce rules of operation by careful analysis, to show the unity of the subject, to develop the reasoning power of the student, and to enable him to impart successfully to others that which he has learned. In order to attain this end, elementary principles must be thoroughly understood, clearly expressed, and accurately applied.

ALGEBRA.

This subject continues through four terms. In the first, special attention is given to the elementary operations and principles and their application to the solution of simple problems. The easier methods of factoring are here taught, but the chief aim of this term's work is familiarity with algebraic language and thoroughness in the four fundamental operations.

No student will be permitted to begin the study of Algebra who has not received credit for Arithmetic.

The second term is a review and an extension of the work of the first,—literal and fractional exponents, and special cases in multiplication and division receiving particular attention. All this is done with reference to factoring to whch the greater part of the term is devoted. Factoring being the basis of all future work in Algebra, satisfactory progress is impossible without a thorough knowledge of this subject.

The third term includes the study of fractions, simultaneous simple equations, involution, and evolution.

THIRD YEAR CLASS.

The last term's work begins with the theory of exponents and embraces the subjects of radicals, radical equations, and quadratic equations.

Texts—Milne's Elements, and Milne's Academic.

GEOMETRY.

The work is begun by requiring the student to observe and construct the geometric forms and to learn the definitions, axioms, and postulates. A clear conception of these is essential to an understanding of the subject since they form the basis of the science. One of the chief objects of the study of Geometry is to cultivate logical exact thought, and clear, accurate expression. To secure this, the fundamental theorems in each book are used, their demonstrations being given—after which a large number of propositions are furnished the student for original demonstration. The application of the principles of Geometry to Mensuration is made a special feature of the last term.

Text—Milne's Plane and Solid Geometry.

TRIGONOMETRY.

The main features of the work in this subject are the following: The functions are defined as ratios and also represented by lines; sufficient analytical work for the development of all important formulas,—special emphasis being given to those essential to the solution of triangles.

Text—Wentworth's Plane Trigonometry.

FAIRMONT STATE COLLEGE LIBRARY

Department of History

The work in this department comprises two terms in U. S. History, two terms in General History, one term in Grecian History, one term in Roman History, one term in English History, one term in Civics, and one term in Economics.

The work in these branches is carried on not only by the use of the text-book, but also by extensive use of the library, the idea being to implant in the student a fondness for history, from a philosophic rather than chronological standpoint, and to show him the close connection existing between history and literature. All facts are learned only as a means to an end, this end being the cultivation of sound judgment and the development of those powers in the pupil which will best serve him in after life. History is adapted as a culture study by giving such concepts of human life and action as will impress upon the thoughtful student the effects of environment and character building, first upon the individual, and through him, upon the race.

The school library is well supplied with historic literature, histories for comparative reference, novels and works upon historical subjects. In addition to text-book work the student is also given topics to develop from outside sources.

UNITED STATES HISTORY.

The plan recommended by the Committee of Ten, that an intensive study of some period of history be followed, has been adopted, and the topics recommended by the Committee will be used as far as practicable. The outline in this branch is intended to present the development and growth of America from its discovery, settlement, colonization, revolution, development of the Constitution, &c.

In connection with the history, biographical interest is awakened by short sketches from the lives of the great statesmen. The study of the institutional life of the country is considered of primary importance as it is the knowledge that will best serve the pupil in after life. To this end the student is encouraged to express his own ideas in connection with what he has gleaned from reading or any outside sources, and an endeavor is made to show him how the questions that present themselves to the people of this country

are the direct effect of past causes, and how, in general, such cause has its corresponding effect.

The object and methods of teaching are also discussed and exemplified. McMaster's History is used as a text.

Reference:—

McMaster—History of the People.
McMaster—With the Fathers.
Fiske—Critical Period of American History.
Fiske—Old Virginia and Her Neighbors.
Hart—American History Told by Contemporaries.

Epochs of American History.

Readings:—

American Commonwealths.
Colonial Children.
Home Life in Colonial Days.
Customs and Fashions in Old New England.
The Last of the Mohicans.
Evangeline.
The Skeleton in Armor.
Concord Hymn.
Landing of the Pilgrims.
Richard Carvel.

GENERAL HISTORY.

Two terms are devoted to General History. Special attention is given to the development of government and civilization. Attention is given to the conditions existing in each country at the present time. Myer's General History is used as a text, and reference is given to the best works in the Library.

Readings:—

China the Long-Lived Empire.
Present Day Egypt.
Russian Life in Town and Country.
German Life in Town and Country.
French Life in Town and Country.
Swiss Life in Town and Country.
Dutch Life in Town and Country.
Nineteenth Century England

HISTORY OF GREECE.

The history of Greece is one of the most interesting, attractive, and culture-giving of all histories. An acquaintance with its historians, orators, and philosophers forms no small part of a liberal education. We study Grecian history primarily on the philosophic

side, that we may learn the influence it has had on the world's history.

Text—Botsford's History of Greece.

Reference—Holm.

Reading—Life of Pericles. Myths of Greece.

HISTORY OF ROME.

In Roman history, the character, manners, and customs of the people and the lessons that we learn from their successes and failures are impressed upon the student. Morey's Outlines of Roman History is used as a text.

Reference:—

Mommsen, Appians and general reference work.

ENGLISH HISTORY.

The history of England is of primary importance to the American people, since we obtain our laws, customs, and government of the Teutonic language, customs, and institutions; the Norman conquest, language, thought, and government; the Magna Charta obtained from King John and its effect on government; the Revival of Learning and the Reformation; Elizabeth's brilliant and successful reign, including the colonization of America, are topics that are fully discussed. Montgomery's English History is used.

Reference:—

Gust's—Handbook of English History.

Colby's—Sources of English History.

Readings:—Ivanhoe.

Lord's Lecture:—Queen Elizabeth.

Lord's Lecture:—Reformation.

MEDIAEVAL HISTORY.

The chief aim of Mediaeval History is to show the marvelous development of the barbaric nations concerned in the overthrow of Rome into the advanced and cultured people of Modern Europe.

This course is optional.

MODERN HISTORY.

Modern History directs the student's attention to those things which the past has contributed to the present and enables him to appreciate and value the progress and emancipation of the marvelous nineteenth century.

This course is optional.

CIVICS.

This course embraces the origin, nature, theory, and necessity of government; the township, its origin and growth, as exhibited in the New England town, the Southern district, and the Western township; and its development into the county; the county into the colony, and the colony into the State; the origin of the Federal Union; the forms of governing the same under the Continental Congress, the Confederation, and the Constitution. Free use is made of the library, and subjects such as the following are investigated: "The Articles of Confederation," "The Ordinance of 1787," "Federalists and Anti-Federalists," "The Federal Executive," "Congress," etc. A great deal of stress is placed on the origin and development of the various parts of our government. Constant reference is made to Fiske's Civil Government, Bryce's American Commonwealth, Hinsdale's American Government, Fiske's Critical Period, Walker's Making of a Nation, Wilson's Theory of the State; McMaster's, Schouler's, and Bancroft's Histories of the United States, and other books of much interest along these lines. The lives of such leaders as Washington, Hamilton, Jefferson, and Madison present a source of much reliable information concerning the "critical period" studied in this course. Text, Willoughby's Civics.

ECONOMICS.

This course is intended to give the student a general knowledge of the more important elements in the existing form of industrial organization and the stages through which it has developed into its present complex system. The following are among the topics treated: The independence and responsibility of the individual as a member of society, freedom in choice of industry and exchange, production, distribution, exchange, transportation, consumption, money. and credit. The origin and significance of modern industrial organization is made clear by a historical study of the industrial systems of England and the United States. Special attention is given to questions involving the relation of the State to private enterprise embracing the subjects of private property, state regulation and control of industry, free trade, protection, taxation, &c. Problems of today, such as socialism, profit-sharing, co-operation, trades unions, monopolies, and trusts are investigated and studied.

From time to time students will be required to prepare written reports on assigned topics; for this reason the ability to write good idiomatic English is required of every student entering this course.

Text—Laughlin's Elements of Political Economy.

Department of Ancient Language

LATIN.

Three years of Latin are offered, of which students in the Normal Course are required to take the first two years (Terms 1-6).

It is the aim of this department to give such instruction in Latin as is required for entrance by the leading colleges and universities of the country. The courses offered are especially designed to correspond to the work of the same grade done at the State University.

The work of the first year includes a thorough drill in the forms of inflection and the essentials of syntax combined with the acquirement of ease and correctness in the translation of easy prose into English and English into Latin as an adequate preparation for the work of the second year. Throughout the course emphasis is laid on the acquirement of a large vocabulary and the habit of deriving English words from the Latin, thus enabling the student to receive important practical benefits from the study of the language in addition to its value as a mental discipline. Attention is also paid to Roman and Greek Mythology and the influence it has had on our literature. The work of the three years is arranged as follows by terms:

FIRST YEAR.

Term 1. Smiley and Storke's "Beginner's Latin Book," lessons 1-30.

Term 2. Smiley and Storke's "Beginner's Latin Book," lessons 31-60.

Term 3. Smiley and Storke's "Beginner's Latin Book," completed. The work of this term will be supplemented by the reading of selections from the first book of Caesar.

NOTE.—Terms 1, 2 and 3 above are the equivalent of courses 1, 2 and 3 at the University.

SECOND YEAR.

Term 4. Caesar's Gallic War (Book I. and II. or an equivalent in the same text). Course 4 at the University.

Term 5. Caesar's Gallic War (Books III. and IV. or an equivalent in the same text). Course 6 at the University.

Term 6. Cicero's First, Second and Third Orations against Cataline. Course 7 at the University.

THIRD YEAR.

Term 7. Cicero's Fourth Oration against Cataline, Oration for Archias, and the Aeneid of Virgil (Book I). Course 9 at the University.

Term 8. Virgil's Aeneid (II., III. and IV.). Supplemented by a study of Greek and Roman Mythology. Course 10 at the University.

Term 9. Virgil's Aeneid (Books IV., V., and VI.). The study of Greek and Roman Mythology continued in connection with the text. Course 11 at the University.

GREEK.

The work in Greek gives such preparation as is required for entrance to the leading colleges and universities, and the two years offered in this subject are arranged to correspond to the two years' preparatory Greek taught at the State University. A thorough drill is given in the inflections, the formation of words and the essentials of syntax during the first year. In the second year the aim is to inspire the student with the love of Greek literature and thought, to arouse an interest in Greek life. and to beget in him the ability to read and appreciate the language as a type of the best literature. The two years' work is arranged by terms as follows:

FIRST YEAR.

Term 1. White's "First Greek Book" (Chapters I-XL).

Term 2. White's "First Greek Book" (completed).

Term 3. Xenophon's Anabasis (Book 1). Prose Composition once a week.

Texts—Goodwin and White's "Xenophon's Anabasis," Goodwin's "Greek Grammar," and Pearson's "Greek Prose Composition."

NOTE.—The above three terms are the same as courses 1, 2, and 3 at the University.

SECOND YEAR.

Term 4. Xenophon's Anabasis (Books II., III., and IV.). Prose Composition once a week. Texts—Same as Term 3. Course 5 at the University.

Term 5. Lysias' Orations. Prose Composition once a week. Collateral reading in the library. Course 6 at the University.

Term 6. Homer's Iliad or Odyssey (Books I., II., and III.): Special attention to Greek Mythology. Seymour's "Iliad." Collateral reading: Jebb's "Introduction to Homer;" Gladstone's "Time and Place of Homer." Course 7 at the University.

Department of Modern Languages

The Board of Regents has recently made German and French a regular part of the established curriculum. Two years' courses in each are offered.

The first year's work embraces principally drills in the accidence, simpler forms of syntax and conversation, together with an introduction to the less difficult gems in the literature, of the fundamental elements of their grammars, and of a good working vocabulary.

The second year will embrace a somewhat extensive course of instruction in their syntax, history and more especially their literatures. The instruction is by recitation in, and citations from, approved text books. Frequent exercises in translations of English into these languages are also required in both year's courses.

Students who expect to enter this department must have a thorough knowledge of the elements of English grammar, and should preferably have completed at least a year of Greek or Latin, although German is taken as a substitute for Greek, and French for Latin.

FRENCH.

1. Chardenal's Complete French Course. and easy conversation throughout the year.

2. Course I. continued; Bocher's Otto's Fr. Reader.

3. Course II. continued; Chardenal's Complete Fr. Course and Bocher's Otto's Reader finished. Halevy's L'Abee Constantin.

SECOND YEAR FRENCH.

4. Grandgent's Selections for Composition, throughout the year. Sand's La Mare au Diable; Merrimee's Colomba.

5. Racine's Esther; Corneille's Le Cid; La Fontaine's Fables.

6. Moliere's Le Bourgeois Gentilhomme; selections of prose and poetry from modern authors.

Science Room.

GERMAN.

Five recitations a week throughout the year.

FIRST YEAR GERMAN.

FALL TERM.....
- Elementary German Grammar.
- Stern's Studien und Plaudersien.

WINTER TERM.....
- Thomas' Practical Grammar.
- Heyese's L'Arrabbiata.
- Von Hillern's Hoher als die Kirche.

SPRING TERM.....
- Thomas' Practical Grammar.
- Stern's Geschichten con Rhein.
- Sight Reading and easy letter writing.

SECOND YEAR GERMAN.

FALL TERM.....
- Harris' Prose Composition.
- Freytog's Die Journalisten.
- Supplementary Grammar Exercises.

WINTER TERM.....
- Harris' Prose Composition.
- German Lyrics and Ballads.

SPRING TERM.....
- Schiller's Wilhelm Tell, or
- Schiller's Marie Stuart.
- Sight reading throughout second year.

Text Books Used

Below is given an exhibit of the character of the subject matter, list of text books used, and time in which they should be completed.

PREPARATORY DEPARTMENT.

Arithmetic, Practical, Milne's Standard: Three terms.
Book-keeping, Bryant and Stratton: One term.
Grammar, Harvey: Three terms.
Geography, Frey or Natural: Two terms.

NORMAL OR ACADEMIC DEPARTMENTS.

Algebra, Milne's Elements: One term.
Algebra, Milne's Academic: Three terms.
Arithmetic. Mental, Brooks: One term.
Astronomy, Young: One term.
Botany: One term. Text to be adopted.
Chemistry, Storer & Lindsay: Two terms.
Civics, Willoughby: One term.
Ethics: One term. Text to be adopted.
Economics, Laughlin: One term.
English, Higher, Reed & Kellogg. Two terms.
French, Whitney, etc.: Six terms.
Greek, White, etc.: Six terms.
Geography, Physical, Davis: One term.
Geology, Le Conte: One term.
Grammar, Patrick: One term.
German, Thomas, etc.: Six terms.
Geometry, Milne: Three terms.
History, Grecian, Botsford: One term.
History, Roman, Morey: One term.
History, English, Montgomery: One term.
History, General, Myers: One term.
History, Mediaeval: One term. Optional.
History of Education, Seeley: One term..
History, Modern: One term. Optional.

Literature, English, Halleck: Two terms.
Literature, American, Hawthorne & Lemon: One term.
Latin (First year), Smiley and Storke: Three terms.
Latin (Second year): One year.
Music, Nat. Music Course: One term.
Orthography, Reed and Irish: Twelve terms.
Physics, Avery: Three terms.
Psychology, Halleck: One term.
Physiology, Overton: One term.
Pedagogy, Boyer: One term.
Rhetoric, Quackenbos: Three terms.
Theory and Practice, Page: One term.
Trigonometry: One term. Text to be adopted.
Zoology, Holder: One term.

Department of Music

MRS. LULU M. BILLINGSLEA, Teacher.

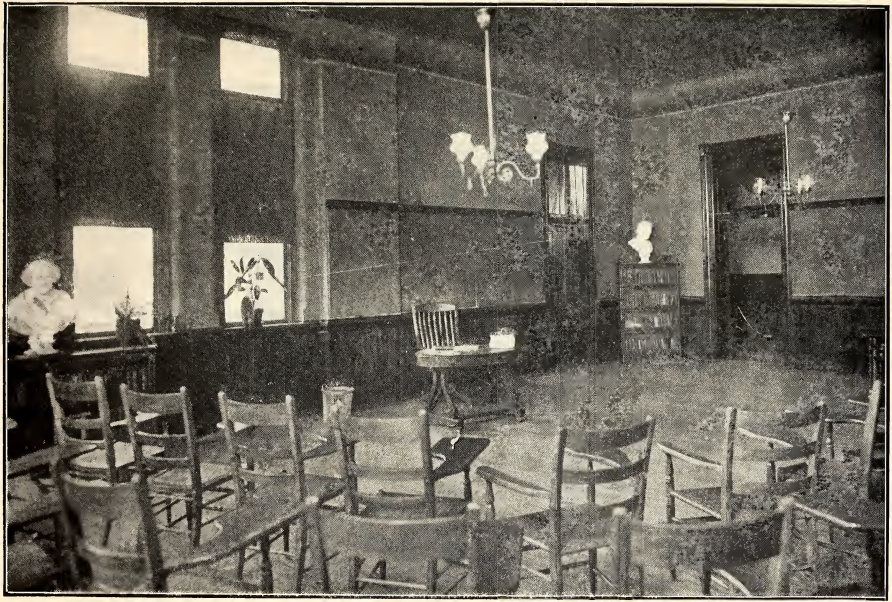
Music, generally speaking. is too apt to be regarded as a mere empty accomplishment. Consequently the time devoted to it is limited, and the knowledge attained superficial.

Experience has taught us that with no very extraordinary gifts, provided there is sufficient general intelligence, every one can accomplish something in music. Many are endowed with natural taste, correct ear, and poetical sentiment who may never have the opportunities necessary to make great artists. These are, however, capable of comprehending and interpreting good music. If only those who are capable of becoming great artists were taught music, we would lose one of the chief sources of recreation, and music, unlike many other amusements, leaves no sting in its trail.

To neglect the ear while we train the eye is to discriminate unfairly against one of the chief senses. To educate the child and not train him in music, is to give him a one-sided culture. He is not a complete man; he is defective; incapable of appreciating the marvelous and inexhaustible beauties of sound; unable to express his feelings in the most expressive way; shut out from sympathetic companionship of those more favored than himself. he has been robbed of his birthright."—From Morgan's "Studies in Pedagogy."

Superior advantages are offered to all who wish to study Piano, Organ, Voice Culture and Sight Singing. A course is offered which is designed for teachers in Public School work. It includes: Ear Training, Tone Production and Sight Singing. During the year opportunities will be given pupils to appear in public.

The tuition for private instruction, on Piano or Organ, is fifteen dollars ($15.00) per term of twenty lessons, payable half at the beginning and the balance at the middle of the term, and no deduction is made for absence except in case of illness.



English Room.

Department of Oratory, Elocution and Physical Culture

DORA ROWE,
Graduate of Emerson College, Boston.

Graduates, 1904, Stella Mae Bosworth, Elkins, W. Va.

"The orator is educated by the quickening and developing of all the intellectual faculties, cultivating the imagination, deepening and guiding the feelings, disciplining all the agents of expression, making the will sovereign, and then leaving him free to express his thoughts, convictions and emotions in accordance with his own temperaments." The personal and literary culture afforded by this training is of the highest value to men and women in every walk of life. "When a man loves the truth and lives it, and can present it effectively to others, he has received the best possible preparation for the work of life as well as for the work of oratory."

The system of physical culture taught preserves and develops health and gives grace and beauty to the body, which produces greater vigor of mind.

Attention is also given to the strengthening and culture of the speaking voice. Stammering, lisping and other defects of speech may be overcome by the application of the principles taught.

General Information

LOCATION.

Fairmont is a growing city in Marion county, seventy-eight miles east of Wheeling, twenty-two miles from Grafton and thirty-three miles from Clarksburg, having the Baltimore & Ohio, the Fairmont, Morgantown & Pittsburg, and the Monongahela River railroads passing through it. It is situated on the banks of the Monangahela river, in the midst of a landscape of surpassing beauty and loveliness. Its population is intelligent and moral, and disposed to extend to students coming among them all the kindness and attention demanded by Christian courtesy and culture.

HISTORY.

The Fairmont State Normal School owes its existence to the beneficence of the citizens of Fairmont and vicinity, and to the Legislature of West Virginia. A bill proposing the establishment of a State Normal School at Fairmont was introduced in the Legislature of 1865-6, but the session adjourned without passing it. Meanwhile the citizens of Fairmont formed a joint stock company under the title of "The Regency of the West Virginia Normal School," and secured a charter. A lot was purchased and the wing of the present public school building, 68 by 40 feet, and two stories high, was commenced in the summer of 1867, but before its completion the Normal School passed under the control of the State.

In February, 1867, the Legislature voted $5,000 to the Fairmont Normal School on condition that $2,000 additional be paid by the citizens of Marion county, the State agreeing to make the same a State Normal School, and to finish and furnish the same, and to open a school therein without delay; whereupon the incorporators, in consideration of $2,000, transferred all their interests to the State.

On February 11, 1872, the Legislature passed the following bill: "That the sum of $5,000 is hereby appropriated out of all the moneys in the treasury, to be expended under the direction of the Regents of the State Normal School at Fairmont, but no part of the sum hereby appropriated shall be drawn from the treasury unless and until the Board of Education of the district of Fairmont

shall pay into the treasury of the State the sum of $5,000, which shall be added to the sum hereby appropriated, the whole constituting a fund of $10,000, to be paid out of the treasury and expended as aforesaid."

By virtue of the last named act, the district of Fairmont claimed to have acquired an equitable interest in the said building, and the two schools occupied the building until 1891, when the growing needs of the Normal School demanded more room. It was decided to petition the Legislature to sell the present Public School building to the District of Fairmont for the sum of $12,000, and also to appropriate $20,000 additional for the erection of a new Normal building.

The bill was passed on the 9th day of March, 1891, and provided for the sale of the old building for $15,000, and appropriated $20,000 additional for the erection of a new Normal building.

In February, 1892, at the City of Charleston, the contract was let for the construction of the present Normal building, and on June 4th the corner-stone was laid by the Masons with imposing ceremonies. On March 27th, 1893, the school formally took possession of the new building, with an interesting program of exercises.

In February, 1895, the Legislature appropriated the additional sum of $12,000 for the completion of the building, by adding the wing which had been contemplated in the original plans. This wing has been completed and furnished.

The Legislature of 1905 appropriated $17,500 for the year ending September 30, '05, and $17,500 for the year ending September 30, '06, for the purpose of building and furnishing a Girls' Dormitory for the school.

Governor A. B. White vetoed the appropriation for the year '05, leaving $17,500 to be used by the Board of Regents for the building.

BUILDING AND GROUNDS.

The building is constructed of red brick with stone sills and lintels. It is well proportioned and presents a grand and imposing appearance. It has a frontage of 100 feet, with a depth of 150 feet.

The basement contains gymnasium rooms for ladies and gentlemen, janitor's room, storage rooms, and rooms for the heating apparatus. The first story contains six large class rooms, a small class room, an apparatus room, and office and two cloak rooms, and five flights of stairs to the second story and basement.

The second story contains a beautiful new chapel and study hall, nine large class rooms, two offices, library, cloak room and ladies' parlor. The third story contains the large auditorium, one

of the finest assembly rooms in the State, capable of seating one thousand persons, and two splendid society halls. There are also two dressing rooms on this floor supplied with lavatories.

The building is finished throughout with West Virginia pine and presents a very pleasing effect. It is ventilated by the Bennett & Peck system, and heated by a new steam plant. The outside steps and platform are Cleveland sandstone with ornate buttresses and trimmings. The entrance to the building from Fairmont avenue is adorned with a handsome vestibule which contains an ornamental steel ceiling. A Howard clock with dials eight feet in diameter adorns the tower. This elegant edifice is placed upon a most beautiful location in what is known as the South Side of Fairmont. The grounds have been recently graded and terraced and a splendid stone wall runs the entire length of the grounds along Fairmont avenue, Second street, Gaston avenue and Third street.

This building is the most complete and commodious of any single school building in the State. A cut of the complete building may be seen on the second page of this catalogue.

PRINCIPALS.

Prof. W. R. White was the first principal of the school after it passed under the control of the State in 1868, and continued such until 1870, when he resigned. He was succeeded by Prof. J. C. Gilchrist, who was principal until 1871. Rev. J. G. Blair, LL. D., was then appointed principal, which position he occupied until his death, December 22, 1878. Miss M. L. Dickey succeeded Dr. Blair as acting principal, continuing as such until 1881, when she resigned and was succeeded by Prof. Ulysses S. Fleming as acting principal until 1883, when the Regents chose as principal Conrad A. Sipe, A. M., who resigned August, 1889. The Regents then appointed Miss N. R. Cameron acting principal, who resigned in June, 1890, and John H. Roemer, A. M., was principal for 1890-91. J. C. Gwynn was chosen as principal in September, 1891, and continued as such until July, 1892, when the Regents chose as principal J. Walter Barnes, A. M. He was succeeded in July, 1901, by M. M. Ross, who continued as principal until his death, December 27, 1902. On the death of Prof. Ross, M. C. Lough, A. M., was made acting principal for the remainder of the year. On August 25, 1903, Principal W. L. McCowan, of the West Liberty State Normal School, was chosen principal.

Suggestions

Students will please remember:

1st. That they are ladies and gentlemen.

2d. That good order is indispensable to the best work.

3d. That there should be a definite time for study, for exercise, for meals, and for sleep.

4th. That there should be no talking or laughing in the class rooms, library or chapel.

5th. There should be no gathering in groups, or promenading on the streets, or absence from rooms during study hours.

6th. Students should retire not later than 10:30 P. M.

7th. That absence and tardiness should never occur except in case of illness.

8th. That politeness, generosity and industry are always appreciated.

9th. That regular attendance at Sunday School and Church services is a duty of the highest importance.

10th. That keeping company with the opposite sex is as a rule inconsistent with strong work in the school.

11th. That no student will be allowed to absent himself from recitations or examinations.

12th. Do not be too anxious to enter advanced classes. There will be no time to make up back studies.

13th. Come expecting to work faithfully and honestly, prepared to make any sacrifice for your own good, and for the good of the school.

14th. Bring with you as useful for study or reference all the text-books you have.

15th. Do not attempt to complete the prescribed course of study unless you have good bodily health and having this do not jeopardize it by practicing the false economy of living without sufficient or suitable food, or necessary comforts.

Facilities for Work

"The true university is a collection of books."—Carlyle.

LIBRARY.

The Alumni library started about twenty years ago by the Alumni Association formed the nucleus of the present Normal Library. Books have been added during recent years, until now it contains three thousand four hundred and thirty-seven volumes (this does not include Government reports, of which there are over two thousand), and is especially complete in the departments of Pedagogy, History, Literature and Economics.

The use of the library is facilitated by a card catalogue containing the title of every book, and the name of its author. Great care has been taken in the selection of books, and the use of them made by the students shows that the collection has been well chosen. The number of reference books is unusually large.

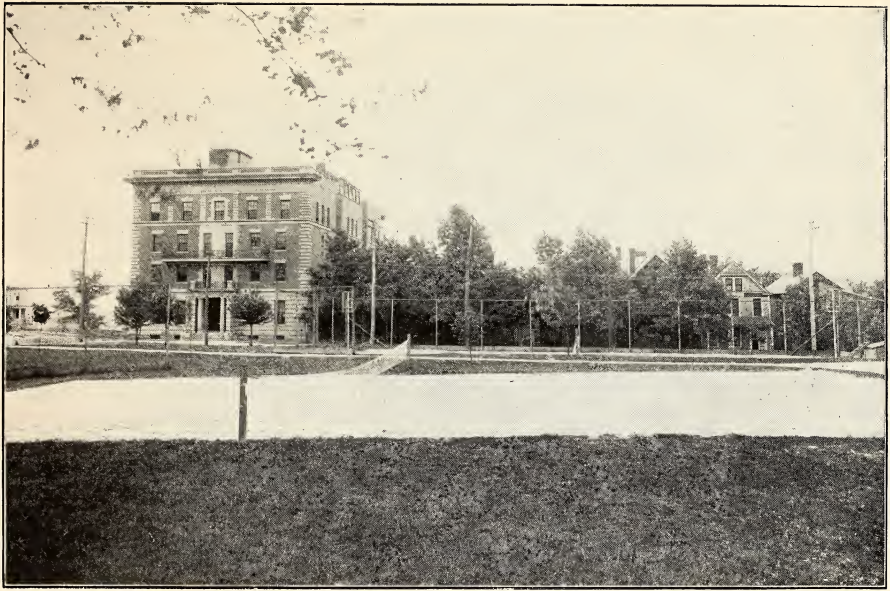
On the second floor near the principal's office is a well lighted room, which is fitted up for a library and reading room. It is furnished with cases, reading tables and easy chairs. The library is open each school day from 2:00 to 4:00 P. M. Students are permitted to take books for home use, but no one shall have more than two books at the same time without special permission, nor retain any book more than two weeks without renewal.

PUBLIC DOCUMENTS.

Through the efforts of Hon. Wm. L. Wilson, this school was designated as a depository of public documents; accordingly all valuable and important works issued by the departments of the government are forwarded to the library.

CURRENT LITERATURE.

Leading articles in the magazines are reported on in the several composition classes, and the students are required to read articles assigned by the teachers. In this way public questions are thoroughly discussed. Current topics in newspapers are also reported from week to week.



Athletic Field

READING ROOM.

An excellent reading room is maintained for the school, and many of the leading periodicals are furnished, among which are the following:

MONTHLY.

American School Board Journal.
*American Education.
Atlantic Monthly.
Century.
Cosmopolitan.
Cumulative Index to Periodicals.
Current Literature.
The Bookmaker.
Fortnightly Review.
Education.

*Weston Independent.
*West Union Record.
*West Virginia Argus.
*Wetzel Democrat.
Wheeling Daily Intelligencer.
Charleston Mail.

*Furnished free by the publishers, to whom thanks are returned.

LITERARY SOCIETIES.

Two literary societies, the Mozart and the Lyceum, are connected with the school. Both ladies and gentlemen may become members of each society. Students are not compelled to join a literary society, but they are advised to do so. A literary society, properly conducted, supplies some features in education that are not likely to be supplied by any other agency. Although a rule adopted by the Regents gives the Faculty control of the literary societies, yet this control is largely delegated to the members, and they elect their officers, assign performances, punish their own members for

neglect of duty, and conduct the affairs of the societies generally, the Faculty having such control and oversight as will prevent any individual from being wronged, the time wasted or the school injured by any improper conduct.

The following are the officers of the Mozart Literary Society, elected May 18, 1905:

President, Arlen Swiger, Harrison County.
Vice-President, Dana W. Feather, Preston County.
Secretary, Miss Stella Hutson, Marion County.
Treasurer, John C. McKinney, Marion County.
Critic, Willard Steele, Harrison County.
Doorkeeper, Frank Reeves, Marion County.

Officers of Normal Lyceum:

President, Ernest B. Harden, of Marion County.
Vice-President, Sylvester Barker, Monongalia County.
Secretary, Miss Zoe Wade, Marion County.
Treasurer, Miss Ethel Hibbs, Marion County.
Censor, Oliver Shurtleff, Marion County.
Critic, Miss Bessie Lucas, Marion County.
Sergeant-at-Arms, Frank C. Haymond, Marion County.

INTER-NORMAL CONTEST.

A. J. Wilkinson, Esq., a prominent graduate of the Fairmont Normal School, class of 1884, has offered to the Normal students an opportunity to compete in oratory by offering two prizes. First prize, $25 in gold; second prize, $10 in gold. In 1898 he offered a prize to the member of the senior class of any of the Normal Schools who would write the best application for a school. This prize was won by Miss Hallie Swan, of Tyler County, a graduate of the Fairmont Normal School.

On the evening of April 8, 1899, in the City of Parkersburg, the second Inter-Normal Oratorical contest was held, and the first prize was won by Mr. Tusca Morris, of the Fairmont Normal School. April 26, 1900, witnessed the third oratorical contest at Clarksburg, Shepherdstown Normal receiving first honors.

The fourth Inter-Normal contest was held in the City of Charleston, February 9, 1901, the representative of the Athens Normal School winning first place.

The fifth annual contest was held April 5, 1902, at Grafton, in which J. C. Bond, a student of this school, won first prize, giving Fairmont three first prizes in five contests.

The sixth annual contest was held at Martinsburg, April 11, 1903, the first prize being won by the representative of Marshall

College Normal School, Miss Willa F. Hickman, of the Fairmont Normal, taking the second prize.

At Hinton, April 16th, the 1904 contest was held. Marshall College was awarded first prize, and Shepherdstown College, second prize. Mr. E. B.Harden represented Fairmont Normal School.

The eighth or 1905 contest, was held at Grafton, W. Va., Saturday evening, April 27th, 1905. Each of the Normal Schools was represented. The judges awarded the prizes as follows:

First—Mr. Lee, of Marshall College.

Second—Mr. Miller, of Shepherdstown College.

Third—Miss Vermillion, of West Liberty.

Mr. William Kennedy represented Fairmont State Normal School.

GYMNASIUM AND ATHLETICS.

The Gymnasium is well supplied with apparatus consisting of striking bags, chest machines, dumb bells, Indian clubs, horizontal bars, parallel bars, etc. Out-door exercise and games are encouraged and a uniformed base ball team has been organized which has sustained itself creditably in several match games. Besides the first team other clubs have been formed, and this most popular of outdoor sports furnishes recreation for a large number of students.

A lawn tennis outfit, basket ball and croquet set have been purchased for outdoor play for the young ladies, and suitable and popular indoor games provided for cold weather.

Much interest has been evinced in all these sports by the students and excellent results have followed.

MORAL CULTURE.

This school is strictly a State institution, and as such is in every respect unsectarian. It esteems sound morality, obedience to truth and virtue, and a courteous regard for the opinions of others as matters of paramount value. Everything that would contaminate the moral character, incur reproach or weaken virtuous habits, is carefully guarded against. There are eleven churches in town, with regular Sabbath services, each having prosperous Sabbath Schools, and other Christian organizations. Students are cordially welcomed to these privileges. All students are required to be present at the chapel exercises of the school each day.

Abundant opportunity presents itself in the life of the school for the testing of the moral character and the exercising of those virtues which are indispensable to the teacher. The cultivation

of such qualities as industry, self-denial, earnestness, and generosity is as important to the student as the development of the mental powers. The intercourse between the students and teachers is characterized by sympathy and mutual helpfulness.

MORAL REQUISITES.

While as a State School this institution is wholly secular and its instruction has no reference to religious, sectarian or political dogmas, yet it is designed to inculcate the principles of good citizenship and honorable manhood. Each student is treated as a gentleman or lady and expected to exhibit a corresponding deportment.

No pupil can continue in this school on other conditions. It is expected that all students properly observe the Sabbath and attend church on that day with some one of the congregations of the town. No immoral, profane or dissipated person can remain a member of the institution. Parents need have no fear in this respect in sending their children to this school.

GOVERNMENT.

The government of the school involves three elements:

1. It is wrong not to do right.
2. The culture of a high sense of personal honor.
3. The highest style of government is self-government.

Students who will not govern themselves cannot hope, as teachers, to govern others. Each pupil is put upon his honor.

The endeavor of the Faculty is to enforce strict discipline in all departments of the school. The aim being to secure this by an appeal to the honor of the student, but in case of failure to secure the desired end in this way, the Faculty will not hesitate to enforce prompt obedience to all rules and regulations. Those who do not conform cheerfully to all requirements will be permitted to withdraw, or be dismissed from the school.

SESSIONS OF SCHOOL.

There is one session a day, beginning at 7:30 A. M. and closing at 12:30 P. M. Study hours are two hours in the afternoon and from 7 to 10 in the evening. Students are required to be present at the chapel exercises each morning at 9 o'clock and to observe study hours as above.

EXAMINATIONS.

Pupils shall attend all required examinations of the year, and no pupil shall be permitted to advance who does not attain a standing of seventy-five per cent., including class standing and examination.

Normal pupils who fail to make a standing of seventy per cent. shall forfeit their State appointment at the end of the term.

These examinations shall be in writing, or partly written and partly oral, and shall be conducted by the instructor in charge, under the supervision of the Principal. The examinations are held at such times as the Faculty may direct.

Candidates for graduation shall complete all regular senior year work two weeks before commencement day. Candidates for graduation having other than regular spring term senior year work will continue in said work until the regular term examinations.

All students who pass examination on a branch and obtain a standing of seventy-five per cent. shall be entitled to a pass certificate which precludes the necessity of further examination on that branch.

STATE CERTIFICATE.

Any person who completes the Normal course of study and who is of good moral character, will receive a diploma, which shall entitle him upon application, without examination, to a State Certificate, good for six years, provided, he shall present satisfactory evidence to the State Board of Examiners that he has taught successfully three years in the State under a Number One Uniform Certificate, two of which said three years shall immediately precede the application for such certificate. When the holder of this State Certificate shall present to the Board satisfactory evidence that he has taught successfully four years under this certificate, he shall be entitled to receive, without examination, a certificate good for twelve years. These certificates are valid in any school in the State, and are equivalent to a Number One Uniform Certificate.

CONDITIONS OF GRADUATION.

Satisfactory examinations shall be passed on all the branches required by the Course of Study. A thesis upon some educational subject shall be required of each candidate for graduation. Also a Commencement Oration is required.

Each candidate for graduation must hand the English teacher an outline of his commencement oration not later than February

1st of the year in which he is to graduate, and the oration complete must be given said teacher by April 15th, following.

STANDARD OF THE SCHOOL.

It is the purpose of the Board of Regents and Faculty of the school to maintain a high degree of scholarship and professional training, so that those who complete the course shall be well prepared for the work of teaching.

POSITIONS FOR TEACHERS.

This school does not provide positions for its graduates or undergraduates, but it will aid them in securing places whenever it is possible. Trained teachers are always in demand. We have many inquiries for good teachers at excellent salaries, and during the past year a larger number of our students were engaged in teaching than ever before, and yet we had calls which we were not able to supply.

NORMAL APPOINTEES.

The number of students which each county in the State shall be entitled to appoint to the State Normal Schools, free of charge for tuition, shall be as follows:

Barbour	90	Mingo	31
Berkeley	138	Monongalia	120
Boone	56	Morgan	48
Braxton	151	Monroe	83
Brooke	48	McDowell	56
Cabell	168	Nicholas	68
Calhoun	63	Ohio	300
Clay	33	Pendleton	63
Doddridge	90	Pleasants	56
Fayette	150	Pocahontas	53
Gilmer	71	Preston	143
Grant	48	Putnam	108
Greenbrier	135	Raleigh	70
Hampshire	80	Randolph	82
Hancock	52	Ritchie	123
Hardy	50	Roane	112
Harrison	150	Summers	93
Jackson	143	Taylor	90
Jefferson	112	Tucker	82
Kanawha	315	Tyler	90
Lewis	112	Upshur	93
Lincoln	82	Wayne	143
Logan	40	Webster	40
Marion	143	Wetzel	123
Marshall	143	Wirt	67
Mason	168	Wood	198
Mercer	120	Wyoming	40
Mineral	93		

ADMISSION.

Any white person of proper moral character having sufficient preparation may be admitted to the school at any time. The age of applicants must be—male, not less than fourteen, and females, not less than thirteen years. It is desirable that all students enrolling shall have previously completed the Common School Course of Study, but Arithmetic, Physiology and United States History may be taught whenever, in the opinion of the Principal, such may be necessary, as evidence of completion of the Common School Course, the diploma, or a first or second grade uniform certificate will be taken, or the student can pass entrance examination.

Upon entering school, the student will be placed in such class or classes as his attainments and ability warrant. Students desiring to enter the third or fourth year classes will be permitted to do so, provided they can pass a satisfactory examination in all the branches belonging to the preceding year.

Applications for appointments to the State Normal Schools should be made to the Superintendent of Free Schools of the county in which the applicant resides, or to the principal of the school which the student desires to attend. You can secure the appointment after you come to school.

Every certificate of appointment to the Normal Schools of this State shall be directed to the school which the applicant may desire to attend. The County Superintendent making such appointment shall at once notify the Principal of said school of such appointment. The Faculty of said school shall, subject to appeal to the Board of Regents, have power to annul any appointment or certificate for non-attendance, inaptitude to learn, immorality, or other good cause. In case of a certificate being thus annulled, the Faculty shall notify the County Superintendent who issued the certificate of such nullification; whereupon, if no appeal is taken to the State Superintendent within twenty days after the action of the Faculty, he may make an appointment to fill the vacancy thus created. Every County Superintendent shall keep a record in his office of all appointments made by him.

Each appointee shall deliver the certificate of appointment to the Principal of the Normal School to which it is directed, and the Principal shall thereupon file it with the records of the school, and enter the name of such person on the register of Normal pupils.

FREE TUITION.

Tuition is free to all students holding appointments.

OTHER EXPENSES.

An incidental fee of $1.60 per term is charged. This fee is due at the time of enrollment and must be paid on entering.

A method called "Rooming" is very popular here both with the students and with the families who take boarders. It is this: The student pays so much for the furnished room and for the cooking, he supplying his own provisions. Whatever he provides is cooked, and his room is taken care of by the family as it would be were he boarding. By this method the cost is reckoned at about $2.25 to $2.75 per week, and the only inconvenience is the matter of providing.

Students who desire to board in clubs can reduce expenses to $2.25 per week by practicing economy. Board can be obtained at rates ranging from $3.00 to $3.50 per week, including room, fuel and lights. Two persons are expected to occupy one room. Those desiring to room alone can usually do so by paying a higher price.

Arrangements for board can be made better after arrival than by correspondence.

VISITORS.

Visitors are made welcome at all times. Teachers and educators are especially invited.

We are also pleased to see patrons of the school, and are glad to have visitors at our chapel exercises, which commence at 9 A. M. The school belongs to the State. Show your interest in it by paying it an occasional visit.

RELIGIOUS ORGANIZATIONS.

A Young Men's Bible Class has been organized recently under the supervision of the International Committee of the Students' Y. M. C. A. The class seeks to cultivate the habit of daily systematic study of the Bible. Membership is entirely voluntary. All young men of the institution are cordially welcomed.

The regular sessions of the Y. W. C. A. are held in the Music Room every Friday evening at 7:15 o'clock. Topics concerning student life are discussed in a manner beneficial to all. This organization wields a great influence for good in this school.

DIRECTIONS.

Those who contemplate attending a Normal School would do well to write us. Do not hesitate to ask questions concerning the school; we like to answer them. When you have decided to attend our school, let us know upon what train you will arrive, and we will meet you at the depot. If you do not know in time to write, and arrive in town between the hours of 7 A. M. and 5 P. M., come to the school building.

SCHOLARSHIPS FOR GRADUATES OF THE F. S. N. S.

Washington and Lee University, Lexington, Va., worth $50.

The Tulane University of Louisiana, New Orleans.

Graduates of the school can learn full particulars concerning these scholarships by addressing the Principal of the Fairmont Normal School, Fairmont, W. Va.

ADVANTAGES SUMMARIZED.

We herewith present a few reasons why the youth of West Virginia, of both sexes, who desire an education that will fit them for business, college or teaching, should attend the Fairmont State Normal School.

1. It is easily accessible.

2. The healthfulness of the place and the sociability of the people are proverbial.

3. The Normal building is large, commodious, in thorough repair, provided with modern furniture, large blackboard surface, maps, library, lexicons, encyclopedias, physical and chemical apparatus, and musical instruments.

4. The Faculty is composed of graduates from the best schools in the country, who have added to their scholarly qualifications a varied and successful experience in teaching in both common and higher grade schools.

5. Thorough instruction in Instrumental Music and Voice Culture is given by one of the best teachers in the State.

6. In the Department of Elocution and Oratory thorough and systematic work is done by a specialist.

7. The school has an ESTABLISHED REPUTATION, and points with pride to the more than five hundred graduates, and to the more than three thousand teachers who attended one or more terms since its organization but did not graduate, who have been and are engaged in the profession of teaching, besides the many who fill positions of trust and profit in political, business and pro-

fessional life, to show the place it occupies in the public esteem. THE DEMAND ANNUALLY MADE UPON THE SCHOOL FOR TEACHERS IS GREATER THAN THE SUPPLY.

8. Tuition for pay pupils is lower than at any school of like grade in the country, being only $6.00 per term of thirteen weeks. State pupils, on appointment, go free.

9. Boarding is only from $2.25 to $3.50 per week. The necessary expenses need not exceed $40.00 per term of 13 weeks.

10. The Academic course in instruction includes those branches embraced in the preparatory schools of our best colleges and universities, among which are higher mathematics and ancient languages, and those who complete this course will be admitted to the University classes without further examination.

11. A special feature is the literary work by the students. The entire school is graded into classes, each one of which is under the direct personal care of one of the teachers. Opportunities for this work are also offered by the Literary Societies.

12. Particular attention is paid to the development of the social qualities of the students. The intermingling of the sexes in the school and society work, where each one is held accountable to the law of personal honor and integrity, has been found to be productive of the most gratifying results. By these means the exercise of discipline has been reduced to the minimum, and the rule of self-government made supreme.

During the past year receptions have been held for the social benefit of the students. Upon these occasions the Faculty has been the receiving party, and they have been found to unite teachers and students much closer, as well as to render the students more intimately acquainted with one another.

Normal Lyceum Hall.

The Alumni

This Association now numbers over five hundred members, over three-fourths of whom are engaged in school work in this and other States. No other influence has been so potent for good to the Fairmont State Normal School as that of her large body of successful and influential graduates. Through them has she been judged, is being judged, and is proud to be judged. Their loyalty is proverbial, their assistance vital, and their visits to the Normal always delightful to Faculty and students.

CLASS OF 1872.

ANNA BELLE AYRES (Mrs. Owen S. McKinney), Palatine, Marion County. Present address, Fairmont. Taught three years.
